

CONTENTS IN DETAIL

ACKNOWLEDGMENTS	xvii
------------------------	-------------

INTRODUCTION	xix
---------------------	------------

Isn't R Just for Statistical Analysis?	xx
Who This Book Is For	xx
About This Book.	xxi

PART I: VISUALIZATIONS **1**

1	
AN R PROGRAMMING CRASH COURSE	3

Setting Up.	4
Installing R and RStudio	4
Exploring the RStudio Interface	4
R Script Files	5
Basic R Syntax.	6
Arithmetic Operators	6
Comparison Operators	7
Functions	8
Working with Data.	9
Importing Data	9
Saving Data as Objects	11
Installing Packages	12
RStudio Projects	13
Data Analysis with the tidyverse.	14
tidyverse Functions	15
The tidyverse Pipe	15
Comments	16
How to Get Help	17
Summary	18
Additional Resources	18

2	
PRINCIPLES OF DATA VISUALIZATION	19

The Drought Visualization	20
The Grammar of Graphics	23
Working with ggplot.	25
Mapping Data to Aesthetic Properties	25
Choosing the Geometric Objects	26
Altering Aesthetic Properties	29
Setting a Theme	31

Re-creating the Drought Visualization	32
Plotting One Region and Year	32
Changing Aesthetic Properties	34
Faceting the Plot	36
Adding Final Polishes	38
The Complete Visualization Code	42
Summary	45
Additional Resources	46

3 CUSTOM DATA VISUALIZATION THEMES 47

Styling a Plot with a Custom Theme	48
An Example Plot	48
The BBC’s Custom Theme	50
The BBC Theme Components	51
Function Definition	51
Text	52
Legend	54
Axes	55
Grid Lines	56
Background	56
Small Multiples	57
Color	58
Summary	59
Additional Resources	59

4 MAPS AND GEOSPATIAL DATA 61

A Brief Primer on Geospatial Data	62
The Geometry Type	62
The Dimensions	66
The Bounding Box	66
The Coordinate Reference System	66
The geometry Column	67
Re-creating the COVID-19 Map	68
Importing the Data	69
Calculating Daily COVID-19 Cases	70
Calculating Incidence Rates	71
Adding Geospatial Data	73
Making the Map	74
Making Your Own Maps	79
Importing Raw Data	79
Accessing Geospatial Data with R Functions	79
Using Appropriate Projections	81
Wrangling Geospatial Data	82
Summary	83
Additional Resources	84

5
DESIGNING EFFECTIVE TABLES **85**

Creating a Data Frame 86
Table Design Principles 87
 Minimize Clutter 87
 Differentiate the Header from the Body 89
 Align Appropriately. 90
 Use the Correct Level of Precision 93
 Use Color Intentionally. 94
 Add a Data Visualization Where Appropriate 95
Summary 97
Additional Resources 97

**PART II: REPORTS, PRESENTATIONS,
AND WEBSITES** **99**

6
R MARKDOWN REPORTS **101**

Creating an R Markdown Document. 102
Document Structure. 103
 The YAML Metadata 104
 The R Code Chunks. 104
 Markdown Text. 106
 Inline R Code 108
Running Code Chunks Interactively. 109
Quarto 111
Summary 111
Additional Resources 111

7
PARAMETERIZED REPORTING **113**

Report Templates in R Markdown 114
 Defining Parameters 117
 Generating Numbers with Parameters 117
 Including Parameters in Visualization Code 118
Creating an R Script 119
 Knitting the Document with Code 120
 Creating a Tibble with Parameter Data 120
Best Practices. 124
Summary 124
Additional Resources 124

8
SLIDESHOW PRESENTATIONS **125**

Why Use xaringan? 125
How xaringan Works 126
 Creating a New Slide 127
 Adjusting the Size of Figures 128

Revealing Content Incrementally	128
Aligning Content with Content Classes.	129
Adding Background Images to Slides	131
Applying CSS to Slides.	131
Custom CSS	132
Themes	133
The xaringanthemer Package	134
Summary	135
Additional Resources	136

9

WEBSITES 137

Creating a New distill Project	138
The Project Files	138
R Markdown Documents	138
The _site.yml File.	139
Building the Site	140
Applying Custom CSS	141
Working with Website Content	143
Applying distill Layouts	148
Making the Content Interactive	148
Hosting the Website	153
Cloud Hosting	153
GitHub Hosting.	154
Summary	155
Additional Resources	155

10

QUARTO 157

Creating a Quarto Document	158
Comparing R Markdown and Quarto	159
The format and execute YAML Fields	159
Individual Code Chunk Options	160
Dashes in Option Names	160
The Render Button	161
Parameterized Reporting.	161
Making Presentations	163
Revealing Content Incrementally	165
Aligning Content and Adding Background Images	165
Customizing Your Slides with Themes and CSS	167
Making Websites	169
Building the Website	170
Setting Options.	171
Changing the Website's Appearance	172
Adjusting the Title and Navigation Bar.	174
Creating Wider Layouts	175
Hosting Your Website on GitHub Pages and Quarto Pub	175
Summary	177
Additional Resources	178

PART III: AUTOMATION AND COLLABORATION

179

11

AUTOMATICALLY ACCESSING ONLINE DATA **181**

Importing Data from Google Sheets with googlesheets4	182
Connecting to Google	182
Reading Data from a Sheet	182
Using the Data in R Markdown	183
Importing Only Certain Columns	187
Accessing Census Data with tidycensus.	188
Connecting to the Census Bureau with an API Key.	188
Working with Decennial Census Data	189
Identifying Census Variable Values	190
Using Multiple Census Variables	190
Analyzing Census Data	192
Using a Summary Variable.	193
Visualizing American Community Survey Data.	194
Making Charts	195
Making Population Maps with the geometry Argument	196
Summary	199
Additional Resources	200

12

CREATING FUNCTIONS AND PACKAGES **201**

Creating Your Own Functions	202
Writing a Simple Function	202
Adding Arguments	203
Creating a Function to Format Race and Ethnicity Data	204
Using ... to Pass Arguments to Another Function	207
Creating a Package	209
Starting the Package	209
Adding Functions with use_r()	210
Checking the Package with devtools	211
Adding Dependency Packages	212
Referring to Functions Correctly.	213
Creating Documentation with Roxygen	214
Adding a License and Metadata	215
Writing Additional Functions	217
Installing the Package	217
Summary	217
Additional Resources	218
Wrapping Up	218

INDEX
