## Numbers

1Password, 154, 276, 282–285
  browser extension, 282–284
  integrating with Dropbox, 284–285

## A

abbreviations, in LaunchBar, training in, 70–71
actions. *See also* files, actions; folders, actions
  AppleScripts as, 153–154
  based on Bluetooth proximity monitor, 133–135
  configuring for Sidekick, 150–152
  location-based, 147–154
active application
  Divvy to resize, 36
  hiding, 5
  quitting, 4
active window, closing or minimizing, 5
Activity Monitor, 342, 344–345
adapter, for display port, 89
address bars, for site-specific browsers, 221
Adium, 135, 154
Adobe Flash Player (preference pane), 45
advanced alert, from script, 129
AirPort, disabling on laptop, 381
AirPort Express Base Station, 255, 256
AirPort Extreme Base Station, 255
  connecting hard drive to, 257–258
  connecting printer's USB cable to, 256
  connecting USB hub to, 262
  passwords, 261
alarms, for laptop, 136
Alarms application, 183, 185–187
album cover artwork, 197
alerts
  Alarms application for advanced, 185–187
  creating basic, 184–185
  in Pester, 183, 184–185
  from script, 128, 129
Alfred (application launcher), 58, 60–67
  for computer control, 66
  Dictionary application and, 63–64
  for math, 62
  Preferences window, 65
  setting up, 60–63
  system commands in, 66
Alfred Powerpack, 60, 66
Amazon, 202
  EC2 cloud computing platform, 306
  for Tor relay, 327
AND operator, in Spotlight, 23
anonymity on Internet, 297, 319–327
Apache web server, 246–247
AppCleaner
  removing applications with, 43–45
  SmartDelete in, 44
*appfirewall.log* file, viewing, 311
Apple
  cloud music service, 190. *See also* iTunes Match
  Developer website, 130
  FileVault recovery key storage by, 333
Apple ID, 190
  linking to iCloud, 230
AppleJack, 359
AppleScript, 121–130
  as action, 153–154
  capabilities, 122
  changing into folder action, 140
  dictionary, 126–127
  executing, 66
  for file and folder actions, 137–146
  flow-control structures, 127–128
  In Range script, 133, 134
  launching, 130
  learning by example, 125–126
  Out of Range script, 133, 134
  use with applications, 126–127
  user interface for scripts, 128–130
  variables, 127
  voice commands, creating with, 105
  writing and running first, 123–124
*AppleScript 1-2-3* (Soghoian and Cheeseman), 130
AppleScript Editor, 123–126
application firewall, 308
application launchers. *See also* Alfred
  configuring Spotlight as, 59–60
  LaunchBar, 67–76
application switcher, opening files with, 31
application-level keyboard shortcuts, 4

author: search operator (Spotlight), 23
automated backup process, 362
automating tasks. *See* AppleScript; macros
Automator
  vs. AppleScript, 122
  for creating folder actions, 140–142
  macro creation with, 110–114
Away message, Out of Range script for setting, 135

## B

Back to My Mac, 237–244
background transfer of data, 317
Backup Left-to-right synchronization option, 268
backups, 361–376
  Dropbox for, 232
  excluding files from, 365
  of hard disks, 330
  of keychain, 281–282
  making exact copy of hard disk, 366–370
  plan for, 362–363
  restoring from, 373–376
  scheduling, 364–365
  storing on Internet, 370–372
  before synchronization, 269–270
  Time Machine, 257, 363–366
backward button, for site-specific browsers, 221
Bambenek, John, *Grep Pocket Reference*, 28
bandwidth
  for CrashPlan, 372, 373
  limiting with NoobProof, 313
  for SOCKS proxy, 299–300
  for Tor relay, 326
Bare Bones Software, 126
battery in laptop
  calibrating, 382–384
  energy settings configuration, 380
  maintenance, 377–384
  monitoring status, 379–380
  replacing, 384
  tips for maintaining health, 378
Belkin Zero Stand, 95
BetterTouchTool, 80, 84–85
BitTorrent, 327
blacklisting, 309
Blind Backup Left-to-right synchronization option, 268
Bluetooth, disabling on laptop, 381
Bluetooth proximity monitor, 131–136
  performing actions based on, 133–135
  setting up, 132–133
Boolean operators, in Spotlight, 23
Bootable Left-to-right synchronization option, 268
booting, in single-user mode, 358
brightness
  automatically adjusting, 48, 49
  of displays and keyboard backlight, 380–381
BusyCal, 188
Butler, 76

## C

Caffeine, 47, 50–51
calculations
  Alfred for, 62
  in Spotlight, hiding results, 21
Calendar, 188
  scheduling events, in LaunchBar, 73–74
  synchronizing Alarms application with, 186–187
calibrating battery in laptop, 382–384
cascading style sheets (CSS), overriding for site-specific browsers, 223
categories in Spotlight, disabling, 59
central processing unit (CPU), 343
  Activity Monitor for checking use, 345
  iStat Menus for monitoring, 347
certificate, for Safari developers, 208–211
Certificate Signing Request, 210
character recognition, with jitouch, 82
Cheeseman, Bill, *AppleScript 1-2-3*, 130
Chrome. *See* Google Chrome web browser
ChronoAgent, 264
ChronoSync, 263–272
  connecting computers, 264–267
  installing, 264
  mapping accounts for, 266
  monitoring, 271–272
  notifications from, 272
  Readiness State pane in, 268
  selecting synchronization option, 268–269
  setting up synchronizations, 267–271
  synchronizing files, 269–270
client-side filtering of spam, vs. server-side, 176–177
cloning hard drives, 367
closing active window, 5
cloud, 229–236
  backup storage on, 370–372
  storing passwords in, 285
coconutBattery application, 379
color of display
  adjusting at night, 51–53
  settings for, 90–91
color of file label, 140
COMMAND key, symbol for, 5
command line, rebuilding Spotlight index with, 26
compressing, folders, 145
computer, controlling, Alfred for, 66
conditional flow-control structures, 128
Contacts
  accessing from LaunchBar, 72–73
  synchronizing Alarms application with, 186–187
CONTROL key, symbol for, 5
converting websites, to applications, 219–227
cover art, adding to iTunes, 197
CoverSutra, 193
  keyboard shortcuts for, 194
  using player, 195
CPU (central processing unit), 343
  Activity Monitor for checking use, 345
  iStat Menus for monitoring, 347
CrashPlan, 370–372
  configuring network options, 372
  restoring from backup, 375–376
credit card numbers, protecting with Keychain Access, 280
cron, for disk permission repairs, 352
CronniX, 353–354
crontab, 352
CSS (cascading style sheets), overriding for site-specific browsers, 223

custom keyboard shortcuts, creating, 10–12
customizing Mac, 6
cycling through windows, 31

## D

Dashboard, 31, 32
Dashboard widgets, removing, 43
data packets, encryption layers for, 320
database-driven website, hosting, 247–248
data-sniffing, HTTPS for protection against, 293
date: search operator (Spotlight), 23
default web browser, setting Safari as, 222
DELETE key, symbol for, 5
deleting. *See* removing
Developer Certificate Utility website, 208
developer files, hiding in Spotlight, 60
dictation feature, 101–102
dictionary, in Spotlight, hiding, 21
Dictionary application, and Alfred, 63–64
disabling
  categories in Spotlight, 59
  energy settings, 50–51
  gestures, 79–80
  macros, 119
discharges, of laptop battery, 378
disconnecting peripherals, for power conservation, 382
disk activity, 343
disk drives. *See* hard drives
disk images, 110
  sizing to fit content, 111
disk permissions repair, 349–354
  automating, 352–354
  manual process, 351–352
disk usage, 343
Disk Utility, 350, 351, 355, 389
  repairing hard disk, 357–358
  verifying hard disk, 356
DiskTools Pro, 359
diskutil command-line utility
  for drive encryption, 335
  `list` command, 330
DiskWarrior, 359
display settings, for site-specific browsers, customizing, 223–227
displays
  adjusting settings, 89–91
    color and resolution, 89–90
    color at night, 51–53
    positioning, 89–90
  brightness of, 380–381
  connecting multiple, 87–95
  energy settings, 48–49
  menu bar availability on multiple, 93–94
  port on Mac for, 88–89
DNS, dynamic, 252–253
DNS encryption, 306
DNSCrypt software, 306
Dock, 5, 57
document categories, in Spotlight, 21
documentation, for extension creation, 217
documents
  ⌘-O shortcut for opening, 4
  automatically saving changes, 16
  searching inside, Alfred for, 65
Doug's AppleScripts for iTunes, 130, 134
downloading voices for Mac, 103
downloads, purging old, 144–145
Dragon Dictate, 105
DriveSavers Data Recovery, 359
Dropbox, 229, 272
  integrating 1Password with, 284–285
  sharing folders with others, 233–235
  for storing and synchronizing files, 232–236
Dropbox Camera Upload, 236
DropDAV, 236
Drupal website hosting, 246
dual core processors, 343
duplicating selected files, 5
Dyn account, registering for, 252–253
dynamic DNS, 252–253
DynDNS account, 253

## E

EasyFind, 28
EFI (Extensible Firmware Interface), 288
EJECT key, symbol for, 5
Electronic Frontier Foundation (EFF), 294, 325
email, 157–169. *See also* Mail application
  adding accounts to Gmail, 177–179
  archiving, with MailSteward, 165–169
  composing messages, in LaunchBar, 72–73
  frequency of checks for, 158–159
  processing with keystrokes, 163–165
  to send files to Dropbox, 236
  smart mailbox creation, 160–161
  spam, 171–182
  tags for categorizing, 161–163
emergency USB drive, 385–389
  creating, 387–388
  evaluating options, 386
  using, 388–389
  viewing in Finder, 389
encryption
  of backup disk, 364
  FileVault whole disk encryption, 331–334
  forcing HTTPS, 293–295
  of hard disks and backups, 329–337
  of Internet connection, 291–306
  SOCKS proxy server for, 299–306
  of Time Machine backup, 335–337
  Triple Data Encryption Standard (DES), 280
Energy Saver, 48, 53
energy settings, 48–49
  configuring for battery, 380
  temporarily disabling, 50–51
enterprise-wide firewall rules, 315
ergonomics, 95
error handling, in AppleScript, 128
excluding files from backup, 365
Exhaust, 17–18
exit relay, in Tor network, 325
Exposé, 31
extending battery life, 379
Extensible Firmware Interface (EFI), 288

files. *See also* backups
actions
automating with AppleScript, 137–146
Hazel for, 142–145
for uploading to web server, 140
changing label color for, 140
Dropbox for storing and synchronizing, 232–236
duplicating selected, 5
excluding from backup, 365
finding, 19–28, 65
missing, and hard disk repair needs, 356
opening with application switcher, 31
repairing permissions, 349–354
restoring from backup, 373–376
sharing, 237
accessing, 241–242
configuring preferences, 240
synchronizing between computers, 263–272
FileVault (FileVault 2), 330
encrypting Time Machine backup disks, 335–337
and recovery disk creation, 387
recovery key for, 332
whole disk encryption, 331–334
filtering
incoming email, 159–160
junk mail, 172–176
spam on server with Gmail, 176–181
Find Any File (shareware application), 26
Finder
Find feature, 19
viewing emergency USB drive in, 89
finding
email messages, smart mailbox for, 161
files and folders, 19–28
Alfred for, 65
messages in MailSteward archive, 168–169
tagged email messages, 163
Firefox web browser
1Password extension for, 283–284
Firesheep extension for, 293
HTTPS Everywhere extension for, 293–295
routing websites through SOCKS server for, 302
SOCKS proxy server settings in, 303
for Tor, 322
Firesheep extension for Firefox, 293
firewalls, 302, 307–317
how they work, 308–309
OS X application, 309–311
firmware, password protection, 287–289
Flickr, Fluid group on, 221
Flip4Mac (preference pane), 45
flow-control structures, in AppleScript, 127–128
Fluid
for creating site-specific browser, 220–222
user styles for, cleaning up, 224
F.lux, 47, 51, 52
folders
actions
automating with AppleScript, 137–146
Automator for creating, 140–142
changing AppleScript into, 140
Hazel for, 142–145
OS X, 138–140
Applications folder, 57
archiving, 145
in Dropbox, 233–235
symbolic links for, 236
finding, 19–28
Library folder, 104, 282
moving forward or backward in, 6
moving media folder to different location, 202
repairing permissions, 349–354
selecting for synchronization, 267–268
sharing (accessing remotely), 241–242
for voice commands, 104
forward button, for site-specific browsers, 221
FreeBSD IP packet filter, 311. *See also* ipfw
Friedl, Jeffery, *Mastering Regular Expressions*, 28
fsck command-line utility, 356, 358

## G

geographic location, Alfred setting for, 61
Gesture Triggering slider, 82
gestures, 77–86
BetterTouchTool for, 84–85
customizing or disabling, 79–80
with third-party applications, 80–85
jitouch for, 82–84
learning to use, 79
with MagicPrefs, 81–82
in OS X, 78–80
Get Info window, 23
Git, 217
global login items, adding, 15
global page, for Safari extension, 215–216
Gmail, 169
adding email accounts to, 177–179
enabling IMAP access, 179–180
filtering spam on server with, 176–181
Mail application for reading, 180–181
Google, music offerings from, 202
Google Chrome web browser
1Password extension for, 283–284
and site-specific browsers, 222
Google Drive, 236
Google Reader Symphonia Final 2 user style, 224
grep (command-line tool), 28
*Grep Pocket Reference* (Bambenek), 28
Griffin Elevator stand, 95
Grooveshark music website, 226–227
Group windows by application option, 32

iPhoto, 231–232
iStat Menus, 342, 346–348
iStat Pro, 348
iTools, 230
iTunes, 15, 189
adding missing cover art, 197
adding missing metadata to library, 195–197
controlling with shortcuts, 193–195
LaunchBar for playing songs, 74–75
library management, 198–202
adding existing libraries, 198–199
copying songs between libraries, 200
creating new library, 199–200
duplicating, 200
pausing, 134
iTunes Match, 190–193, 202
signing up for, 190–191
upgrading music, 191–192

## J

jitouch, 80, 82–84
job scheduler, cron as, 352–353
junk mail filtering, 172–176
server-side vs. client-side, 176–177

## K

KeePass, 285
keyboard, backlight brightness, 380–381
Keyboard Maestro, 12, 114–119
configuring groups of macros, 118–119
creating macro, 117–118
Editor window, 115
enabling existing macros, 115
keyboard shortcuts, 3
for Alfred, 60, 61, 62
for application switcher, 30
built-in, for OS X, 4–10
changing
application level, 8–10
system level, 6–7
for CoverSutra, 194
creating, 10–12
for dictation, 101
for email, 163–165
for iTunes, 193–195
for LaunchBar, 67, 68, 69
learning, 4–6
as Maestro triggers, 116
for Mission Control, 33–34
modifiers in, 5
reference guide for, 6
to resize window, 36
for script, 130
keychain, repairing and backing up, 281–282
Keychain Access, 276, 278–285
locking and unlocking keychain, 281
protecting sensitive information with, 280–281
requesting certificate with, 209
signed certificate stored in, 211
window, 278
keystrokes, processing email with, 163–165
`kill` command, 343, 346
kind: search operator (Spotlight), 23

## L

label color, changing for file, 140
laptop. *See also* battery in laptop
alarms for, 136
