Errata for *Black Hat Go* (updated to 3rd printing)

Page 50: The code line that reads:

```
import {
        encoding/json"
        log
        net/http
}
```

should now read:

```
import (
        encoding/json"
        log
        net/http
)
```

Page 90: The code line that reads:

```
$ docker run --rm -it -p 127.0.0.180:80 robbertkl/roundcube
```

should now read:

```
$ docker run --rm -it -p 127.0.0.1:80:80 robbertkl/roundcube
```

Page 114: We deleted the line `return ips, nil` from the `for` loop, so it should now read:

```
for _, answer := range in.Answer {
        if a, ok := answer.(*dns.A); ok {
                ips = append(ips, a.A.String())
        }
}
return ips, nil
```

Page 116: The code lines:

```
for scanner.Scan() {
        fqdns <- fmt.Sprintf"%s.%s", scanner.Text(), *flDomain)
}
// Note: We could check scanner.Err() here.
```

should be moved so they appear after the `go` function.

Page 146: The code line that reads:

```
$ go get github.com/bhg/ch-6/smb
```

should now read:

```
$ go get github.com/blackhat-go/bhg/ch-6/smb
```

Page 164: The code line that reads:

```
"github.com/bhg/ch-7/db/dbminer"
```

should now read:

```
"github.com/blackhat-go/bhg/ch-7/db/dbminer"
```

Page 222: The code line that reads:

```
"github.com/bhg/ch-10/plugin-core/scanner"
```

should now read:

```
"github.com/blackhat-go/bhg/ch-10/plugin-core/scanner"
```

Page 254: The code line that reads:

```
"github.com/bhg/ch-11/rc2-brute/rc2"
```

should now read:

```
"github.com/blackhat-go/bhg/ch-11/rc2-brute/rc2"
```
