INTRODUCTION

xxi

What This Book Is	xxii
Who This Book Is For	xxii
What's in the Book	xxiii
A Note on Mistakes	xxv
Online Resources	xxvi

PART I PLANNING

1

WHAT TO BUILD AND HOW TO PLAN FOR IT

3

Requirements and Specifications	4
Identifying Product Requirements	4
Writing Specifications	9
Staying on Schedule	10
Paying for Speed	11
Reducing Risk	11
Anticipating Delays	12
Basic Manufacturing Process Steps	13
Conclusion	16

2

COMPONENT SPECIFICATIONS AND PURCHASING

17

How to Choose the Right Parts for Your Design	17
Component Properties	18
Component Packaging	19
How to Buy Parts	21
Selecting a Distributor	21
Understanding How Parts Are Distributed	23
Determining Quantity	25
Conclusion	26

3

SELECTING PASSIVE COMPONENTS

27

Capacitors	27
Multilayer Ceramic Capacitors	28
Aluminum Electrolytic Capacitors	31
Film Capacitors	31
Supercapacitors	32
Tantalum Capacitors	32
Capacitance vs. Frequency	33
High-Frequency Signals	35
Parasitic Inductance	35
Common Capacitor Values	36
Fail-Safe Capacitors	37
Resistors	38
Tolerance	38
ESD Damage	38
Temperature Effects	38
High-Power Resistors	39
Current-Sense Resistors	39
Resistors as Voltage Dividers	39
Common Resistor Values	40
Inductors	41
Switched-Mode Power Supplies	42
High-Frequency Applications	42
Ferrite Beads	42
Power Ratings vs. Signal Ratings	43
Temperature Effects	44
Current Effects	44
Connectors and Cables	44
Connector Requirements	45
Interference and Noise	47
RF Connectors and Cables	48
Safety Considerations	50
Naming Confusion	51
Crimped Connectors	52
Circuit Protection	55
Filters for Electromagnetic Interference	55
Overvoltage Events	57
Silicon-Controlled Rectifier Latch-Up	59
Fuses for Overcurrent Events	60
Reverse Bias Protection	62
Galvanic Isolation	62
Conclusion	63

4	SELECTING ACTIVE COMPONENTS	65
Advertised vs. Actual Performance		65
Oscillators and Crystals		66
Power Supplies		67
Voltage Conversion		67
Low-Dropout Regulators		69
Thermal Shutdown		69
Microcontrollers		70
Choosing the Right Microcontroller		70
Considering Software Development Environments		71
Derating the Operating Parameters		71
RF Components		72
Frequency-Dependent Parameters		72
Amplifiers		72
Transistors		74
MOSFETs		74
Drivers		75
Drain-to-Source Resistance		75
Diodes		76
Batteries		77
Lithium		78
Lead Acid		79
Alkaline		79
Conclusion		80

PART II DESIGNING

5	SCHEMATIC DESIGN	83
Conventions		83
Labeling and Organization		84
Supplemental Information		89
Formatting		90
Review Checklist		92
Debugging		95
Ensuring Performance		97
Capacitors for ICs		99
Ferrite Beads		99
Amplifiers		101
Conclusion		101

6

LAYOUT DESIGN

103

Keys to Success	103
Designing for Performance	106
PCB Physics	106
Design Tips	108
Testing Considerations	110
Creepage and Clearance Requirements	112
High-Speed Design Considerations	112
Stackup Design	121
Layers	121
Substrates	121
Traces	125
Vias	130
A Stackup Example	134
Thermal Considerations	135
Common Gotchas	140
DRC Checks	141
Footprint Mistakes	141
Conclusion	142

7

DESIGN FOR EXCELLENCE

143

Design for Fabrication	143
Fabricator Constraints	144
PCB Markings	145
Copper Thieving	148
Panelization	149
Design for Assembly	152
Fiducials	153
Markings to Aid Assembly	154
Soldering Considerations	155
Enclosures	156
Cables and Connectors	157
Design for Test	159
Design for Reliability	161
Conclusion	163

8

REGULATORY REQUIREMENTS FOR ELECTROMAGNETIC COMPATIBILITY AND IMMUNITY

165

Reducing Electromagnetic Emissions	166
Differential Pairs	168
Signal Integrity	170

Connectors	171
Power Planes	171
Shielding	172
Conclusion	173

9 COST ENGINEERING 175

Overall Strategy	175
Cost Reduction in the Schematic	177
Cost Reduction in the Layout	179
Cost Reduction in Assembly	182
Conclusion	183

PART III BUILDING

10 PROTOTYPING 187

The Prototyping Mindset	188
The Minimum Viable Product	190
Refining Your Prototype	192
Intellectual Property Protection	193
How to Speed Up Hardware Development	193
Helpful Tools	197
Modules, Evaluation Boards, and Breakout Boards	197
Breadboards	198
Prototyping Platforms	199
RF Prototyping Tools	201
Maintaining a Lab Notebook	202
Notebook Options	203
What a Notebook Should Include	203
Conclusion	208

11 BUILDING A LAB 209

Lab Safety	209
Lab Furniture	211
Soldering Equipment	211
Irons	212
Microscopes	213
Other Equipment	213
Lab Storage Options	215

Test Equipment	217
Power Supplies	219
Multimeters	219
Oscilloscopes	220
Logic Analyzers	221
Test Leads	221
Spectrum Analyzers	222
Vector Network Analyzers	223
Small Hand Tools	224
Conclusion	226

12

FABRICATION AND ASSEMBLY

227

Preparing for Fabrication	228
Buying Parts	230
Finding and Working with Contract Manufacturers	232
Respecting Your Contract Manufacturer	234
Navigating Standards and Certifications	234
PCB Fabrication	237
Etching	237
Milling	239
Hiring a Fabricator	239
How Assembly Works	241
Soldering	242
Soldering-Iron Techniques	242
Flux	243
Solder Alloys	245
Solder Paste	246
Wave Soldering	246
Reflow	247
Safety	251
Tips for Assembly	251
Documentation	252
Tools	253
Conformal Coatings and Potting Materials	254
Cleaning and Storage	256
Inspection and Testing	257
System Integration	258
Conclusion	259

13	261
TESTING	
The Philosophy of Testing	261
Regulatory Testing	263
Approval Marks	263
Electromagnetic Compatibility	264
Battery Certification	266
Medical Device Approval	266
PCB Functionality Tests	266
Board Bring-Up	267
Test Fixtures	268
Designing Tests	269
The Failure Point	273
Electrostatic Discharge	274
Humidity	275
How to Avoid Problems with Tests	278
Conclusion	279

14	281
TROUBLESHOOTING	
Getting to the Root Cause of a Problem	282
How Electronics Fail	282
Practical Tips	283
Troubleshooting Models	287
The Medical Model for Troubleshooting	287
Narrative-Based Troubleshooting	291
Scientific Troubleshooting	292
Conclusion	293

A	295
HOW TO GIVE A DEMO	
Knowing Your Audience	295
Telling a Story	296
Practical Tips	298

B	
RECOMMENDED RESOURCES	301
Tools	301
PCB Fabrication and Assembly	302
Contract Manufacturers	302
Part Fabrication	303
Materials	304
Paperwork	304
Shipping and Logistics	304
Design Services	305
Chip Fabrication	305
Component Distributors	305
Fulfillment	306
 C	
EXAMPLE FABRICATION NOTES	307
 INDEX	311
