

## Errata for *Dive Into Algorithms* (updated to 2<sup>nd</sup> printing)

**Page 122:** Listing 6-6's caption which reads:

This function performs the full simulated annealing process and returns an optimized itinerary.  
should now read:

We updated our perturb function to allow resetting: if a certain number of steps have not yielded any improvements, we reset our itinerary to be the same as the best previous itinerary we've found so far.
