Linux Basics for Hackers, 2nd edition

Getting Started with Networking, Scripting, and Security in Kali

by OccupyTheWeb

Errata updated to print 1

Page	Error	Correction	Print corrected
169	To test whether the new module loaded properly, you can run the `dmesg` command, which prints out the message buffer from the kernel, and then filter for "**v**ideo" and look for any alerts that would indicate a problem: ```kali> dmesg	grep video``` If there are any kernel messages with the word "**v**ideo" in them, they will be displayed here.
