Contents in Detail

Acknowledgments **xxi**

Introduction **xxvii**
What Is This Book? . . . xxvii
A Word About p5.js . . . xxviii
What Do You Need to Know? . . . xxviii
How Are You Reading This Book? . . . xxix
The Coding Train Connection . . . xxx
Additional Resources . . . xxx
The "Story" of This Book . . . xxx
Part 1: Inanimate Objects . . . xxxi
Part 2: It's Alive! . . . xxxii
Part 3: Intelligence . . . xxxii
Using This Book as a Syllabus . . . xxxiii
How to Read the Code . . . xxxiii
Full Examples . . . xxxiv
Complete Snippets . . . xxxv
Context-Free Code . . . xxxv
Snipped Code . . . xxxvi
Exercises . . . xxxvii
Solutions . . . xxxvii
The Ecosystem Project . . . xxxvii
Getting Help and Submitting Feedback . . . xxxviii

0
Randomness **1**
Random Walks . . . 2
The Random Walker Class . . . 3
Example 0.1: A Traditional Random Walk . . . 6
Example 0.2: A Random-Number Distribution . . . 8
Probability and Nonuniform Distributions . . . 9
Example 0.3: A Walker That Tends to Move to the Right . . . 12
A Normal Distribution of Random Numbers . . . 13
Example 0.4: A Gaussian Distribution . . . 15
A Custom Distribution of Random Numbers . . . 16
Example 0.5: An Accept-Reject Distribution . . . 18

A Smoother Approach with Perlin Noise 19
Noise Ranges 22
Example 0.6: A Perlin Noise Walker 24
Two-Dimensional Noise 25
The Ecosystem Project 31

1
Vectors **33**
The Point of Vectors 34
Example 1.1: Bouncing Ball with No Vectors 35
Vectors in p5.js 37
Vector Addition 40
Example 1.2: Bouncing Ball with Vectors! 43
More Vector Math 45
Vector Subtraction 46
Example 1.3: Vector Subtraction 47
Vector Multiplication and Division 48
Example 1.4: Multiplying a Vector 49
Vector Magnitude 51
Example 1.5: Vector Magnitude 52
Normalizing Vectors 53
Example 1.6: Normalizing a Vector 54
Motion with Vectors 55
Example 1.7: Motion 101 (Velocity) 57
Acceleration 59
Algorithm 1: Constant Acceleration 60
Example 1.8: Motion 101 (Velocity and Constant Acceleration) 61
Algorithm 2: Random Acceleration 62
Example 1.9: Motion 101 (Velocity and Random Acceleration) 63
Static vs. Nonstatic Methods 64
Algorithm 3: Interactive Motion 66
Example 1.10: Accelerating Toward the Mouse 68
The Ecosystem Project 69

2
Forces **71**
Forces and Newton's Laws of Motion 72
Newton's First Law 72
Newton's Third Law 73
Newton's Second Law 75
Force Accumulation 77
Factoring In Mass 79
Creating Forces 82
Example 2.1: Forces 83

Example 2.2: Forces Acting on Two Objects 86
Example 2.3: Gravity Scaled by Mass 88
Modeling a Force 88
Friction 90
Example 2.4: Including Friction 93
Air and Fluid Resistance 94
Example 2.5: Fluid Resistance 99
Gravitational Attraction 101
Example 2.6: Attraction 107
Example 2.7: Attraction with Many Movers 109
The n-Body Problem 110
Example 2.8: Two-Body Attraction 112
Example 2.9: n Bodies 114
The Ecosystem Project 116

3
Oscillation **117**
Angles 118
Angular Motion 120
Example 3.1: Angular Motion Using rotate() 121
Example 3.2: Forces with (Arbitrary) Angular Motion 124
Trigonometry Functions 125
Pointing in the Direction of Movement 126
Example 3.3: Pointing in the Direction of Motion 129
Polar vs. Cartesian Coordinates 130
Example 3.4: Polar to Cartesian 132
Properties of Oscillation 134
Example 3.5: Simple Harmonic Motion I 137
Oscillation with Angular Velocity 138
Example 3.6: Simple Harmonic Motion II 139
Example 3.7: Oscillator Objects 141
Waves 142
Example 3.8: Static Wave 143
Example 3.9: The Wave 145
Spring Forces 147
Example 3.10: A Spring Connection 152
The Pendulum 154
Example 3.11: Swinging Pendulum 161
The Ecosystem Project 165

4
Particle Systems **167**
Why Particle Systems Matter 168
A Single Particle 169
Example 4.1: A Single Particle 172

An Array of Particles 174
Example 4.2: An Array of Particles 178
A Particle Emitter 179
Example 4.3: A Single Particle Emitter 181
A System of Emitters 182
Example 4.4: A System of Systems 184
Inheritance and Polymorphism 185
Inheritance Basics 187
Polymorphism Basics 192
Particles with Inheritance and Polymorphism 193
Example 4.5: A Particle System with Inheritance and Polymorphism 196
Particle Systems with Forces 197
Example 4.6: A Particle System with Forces 199
Particle Systems with Repellers 200
Example 4.7: A Particle System with a Repeller 203
Image Textures and Additive Blending 205
Example 4.8: An Image-Texture Particle System 207
Example 4.9: Additive Blending 209
The Ecosystem Project 211

5
Autonomous Agents **213**
Forces from Within 214
Vehicles and Steering 215
The Steering Force 217
Example 5.1: Seeking a Target 222
The Arrive Behavior 224
Example 5.2: Arriving at a Target 227
Your Own Behaviors 229
Example 5.3: "Stay Within Walls" Steering Behavior 232
Flow Fields 233
Example 5.4: Flow-Field Following 239
Path Following 240
The Dot Product 240
Simple Path Following 243
Example 5.5: Creating a Path Object 245
Example 5.6: Simple Path Following 251
Path Following with Multiple Segments 252
Example 5.7: Path Made of Multiple Line Segments 254
Example 5.8: Path Following 256
Complex Systems 257
Implementing Group Behavior (or: Let's Not Run Into Each Other) 259
Example 5.9: Separation 264

Combining Behaviors 265
Example 5.10: Combining Steering Behaviors (Seek and Separate) 267
Flocking 268
Example 5.11: Flocking 273
Algorithmic Efficiency (or: Why Does My Sketch Run So Slowly?) 274
Spatial Subdivisions 275
Example 5.12: Bin-Lattice Spatial Subdivision 278
Example 5.13: Quadtree 279
More Optimization Tricks 279
Example 5.14: Sin/Cos Lookup Table 282
The Ecosystem Project 285

6
Physics Libraries **287**
Why Use a Physics Library? 289
Importing the Matter.js Library 291
Matter.js Overview 293
Engine 296
Bodies 297
Render 299
Example 6.1: Matter.js Default Render and Runner 301
Matter.js with p5.js 302
Example 6.2: A Comfortable and Cozy p5.js Sketch That Needs a Little Matter.js 303
Step 1: Add Matter.js to the p5.js Sketch 304
Step 2: Link Every Box Object with a Matter.js Body 305
Step 3: Draw the Body 305
Static Matter.js Bodies 307
Example 6.3: Falling Boxes Hitting Boundaries 308
Polygons and Groups of Shapes 309
Example 6.4: Polygon Shapes 309
Example 6.5: Multiple Shapes on One Body 313
Matter.js Constraints 315
Distance Constraints 316
Example 6.6: Matter.js Pendulum 317
Revolute Constraints 319
Example 6.7: Spinning Windmill 320
Mouse Constraints 322
Example 6.8: MouseConstraint Demonstration 324
Adding More Forces 324
Example 6.9: Attraction with Matter.js 325
Collision Events 327
Example 6.10: Collision Events 330
A Brief Interlude: Integration Methods 331

Verlet Physics with Toxiclibs.js 333
Vectors 335
The Physics World 336
Particles 337
Springs 339
Example 6.11: Simple Spring with Toxiclibs.js 340
Soft-Body Simulations 342
A String 343
Example 6.12: Soft Swinging Pendulum 345
A Soft-Body Character 346
Example 6.13: Soft-Body Character 349
A Force-Directed Graph 351
Example 6.14: Cluster 353
Attraction and Repulsion Behaviors 355
Example 6.15: Attraction (and Repulsion) Behaviors 357
The Ecosystem Project 358

7
Cellular Automata **359**
What Is a Cellular Automaton? 360
Elementary Cellular Automata 362
Defining Rulesets 367
Programming an Elementary CA 369
Drawing an Elementary CA 375
Example 7.1: Wolfram Elementary Cellular Automata 377
Wolfram Classification 379
Class 1: Uniformity 379
Class 2: Repetition 380
Class 3: Random 380
Class 4: Complexity 380
The Game of Life 381
The Rules of the Game 382
The Implementation 385
Example 7.2: Game of Life 389
Object-Oriented Cells 390
Example 7.3: Object-Oriented Game of Life 391
Variations on Traditional CA 392
Nonrectangular Grids 393
Probabilistic 394
Continuous 394
Image Processing 394
Historical 395
Moving Cells 395
Nesting 395
The Ecosystem Project 396

8
Fractals **397**
What Is a Fractal? . . . 398
Recursion . . . 401
Implementing Recursive Functions . . . 402
Example 8.1: Recursive Circles Once . . . 405
Example 8.2: Recursive Circles Twice . . . 406
Example 8.3: Recursive Circles Four Times . . . 407
Drawing the Cantor Set with Recursion . . . 407
Example 8.4: The Cantor Set . . . 410
The Koch Curve . . . 411
Example 8.5: The Koch Curve . . . 417
Trees . . . 419
The Deterministic Version . . . 419
Example 8.6: A Recursive Tree . . . 424
The Stochastic Version . . . 425
Example 8.7: A Stochastic Tree . . . 426
L-systems . . . 427
Example 8.8: Simple L-system Sentence Generation . . . 429
Example 8.9: An L-system . . . 433
The Ecosystem Project . . . 435

9
Evolutionary Computing **437**
Genetic Algorithms: Inspired by Actual Events . . . 438
Why Use Genetic Algorithms? . . . 440
How Genetic Algorithms Work . . . 442
Step 1: Population Creation . . . 443
Step 2: Selection . . . 444
Step 3: Reproduction . . . 447
Step 4: Repetition! . . . 450
Coding the Genetic Algorithm . . . 450
Step 1: Initialization . . . 450
Step 2: Selection . . . 452
Step 3: Reproduction (Crossover and Mutation) . . . 457
Putting It All Together . . . 459
Example 9.1: Genetic Algorithm for Evolving Shakespeare . . . 459
Customizing Genetic Algorithms . . . 463
Key 1: The Global Variables . . . 463
Key 2: The Fitness Function . . . 464
Key 3: The Genotype and Phenotype . . . 467
Evolving Forces: Smart Rockets . . . 469
Developing the Rockets . . . 470
Managing the Population . . . 475
Example 9.2: Smart Rockets . . . 477

Making Improvements 478
Example 9.3: Smarter Rockets 482
Interactive Selection 482
Example 9.4: Interactive Selection 485
Ecosystem Simulation 487
Genotype and Phenotype 490
Selection and Reproduction 491
Example 9.5: An Evolving Ecosystem 493
The Ecosystem Project 495

10
Neural Networks **497**
Introducing Artificial Neural Networks 499
How Neural Networks Work 500
Machine Learning Libraries 502
The Perceptron 502
Perceptron Steps 503
Putting It All Together 504
Simple Pattern Recognition Using a Perceptron 505
The Perceptron Code 508
Example 10.1: The Perceptron 515
Putting the "Network" in Neural Network 517
Machine Learning with ml5.js 521
The Machine Learning Life Cycle 521
Classification and Regression 522
Network Design 524
ml5.js Syntax 528
Building a Gesture Classifier 529
Collecting and Preparing the Data 530
Choosing a Model 531
Training the Model 532
Evaluating the Model 534
Turning the Parameters 537
Deploying the Model 537
Example 10.2: Gesture Classifier 539
The Ecosystem Project 542

11
Neuroevolution **543**
Reinforcement Learning 545
Evolving Neural Networks Is NEAT! 549
Coding Flappy Bird 550
Example 11.1: Flappy Bird Clone 553

Neuroevolutionary Flappy Bird 554
The Bird Brain 555
Variation: A Flock of Happy Birds 557
Selection: Flappy Bird Fitness 559
Heredity: Baby Birds 561
Example 11.2: Flappy Bird with Neuroevolution 564
Steering the Neuroevolutionary Way 565
Example 11.3: Smart Rockets with Neuroevolution 567
Responding to Change 567
Speeding Up Time 570
Example 11.4: Dynamic Neuroevolutionary Steering 572
A Neuroevolutionary Ecosystem 573
Sensing the Environment 573
Example 11.5: A Bloop with Sensors 577
Learning from the Sensors 578
Example 11.6: A Neuroevolutionary Ecosystem 581
The Ecosystem Project 582
The End 583

Appendix
Creature Design **585**
