

Errata for *Object-Oriented Python* (updated to 1st printing)

Page 37: In the TV.py class file on line 23 of the code, the line that reads:

```
self.volume = self.VOLUME_MAXIMUM // # integer divide
```

should now read:

```
self.volume = self.VOLUME_MAXIMUM // 2 # integer divide
```

Page 63: In Listing 4-3, the line that reads:

```
print('After depositing 100, the user's balance is:', usersBalance)
```

should now read:

```
print("After depositing 100, the user's balance is:", usersBalance)
```

The same error should also be corrected on page 65 in Listing 4-4, and on page 67 in Listing 4-5.

Page 123: In Listing 6-1, the line labeled with (5) should be outdented by one level.
