CONTENTS

PREFACE ix

1
WHAT IS A DATABASE? 1

Why Do We Need Databases? 2
What's Up in the Kingdom? 16
Data Is Duplicated 16
Data Can Conflict 17
Data Is Difficult to Update 18
A Database—That's Our Solution! 19
How to Use a Database 19
Summary 21

2
WHAT IS A RELATIONAL DATABASE? 23

Database Terms 24
Relational Databases 34
Types of Data Models 39
Data Extraction Operations 39
Set Operations 39
Relational Operations 43
Questions 45
The Relational Database Prevails! 47
Summary 48
Answers 48

3
LET'S DESIGN A DATABASE! 49

The E-R Model 50
Normalizing a Table 56
What Is the E-R Model? 74
How to Analyze the E-R Model 74
Case 1: One-to-One Relationship 74
Case 2: One-to-Many Relationship 75
Case 3: Many-to-Many Relationship 75
Questions 76
Normalizing a Table 78
Questions 79
Steps for Designing a Database 81
Summary 81
Answers 82

4
LET'S LEARN ABOUT SQL! 85
Using SQL 86
Searching for Data Using a SELECT Statement 93
Using Aggregate Functions 98
Joining Tables 101
Creating a Table 103
SQL Overview 106
Searching for Data Using a SELECT Statement 106
Creating Conditions 107
Comparison Operators 107
Logical Operators 107
Patterns 108
Searches 108
Questions 109
Aggregate Functions 110
Aggregating Data by Grouping 110
Questions 111
Searching for Data 112
Using a Subquery 112
Using a Correlated Subquery 113
Questions 114
Joining Tables 114
Creating a Table 115
Inserting, Updating, or Deleting Rows 116
Creating a View 117
Questions 118
Summary 119
Answers 119

5
LET'S OPERATE A DATABASE! 125
What Is a Transaction? 126
What Is a Lock? 131
Database Security 138
Speeding Things Up with Indexing 143
Disaster Recovery 148
Properties of Transactions 153
Atomicity 153
Consistency 154
Isolation 155
Durability 159
When Disaster Strikes 161
Types of Failures 161
Checkpoints 161
Questions 162

Indexes 162
Questions 164
Optimizing a Query 164
Nested Loop 165
Sort Merge 166
Hash 166
Optimizer 167
Summary 167
Answers 167

6
DATABASES ARE EVERYWHERE! 169

Databases in Use 175
Databases and the Web 177
Distributed Databases 183
Stored Procedures and Triggers 185
Databases on the Web 194
Using Stored Procedures 196
Questions 196
What Is a Distributed Database? 197
Horizontal Distribution 197
Vertical Distribution 198
Partitioning Data 198
Horizontal Partitioning 198
Vertical Partitioning 199
Preventing Inconsistencies with a Two-Phase Commit 199
Questions 201
Database Replication 201
Read-Only 201
Replication Enabled for All Servers 202
Further Application of Databases 202
XML 202
Object-Oriented Databases 203
Summary 205
Answers 205
Closing Remarks 205

APPENDIX
FREQUENTLY USED SQL STATEMENTS 207
