contents in detail

acknowledgments ..... **xvii**

introduction ..... **xix**
why this book? xix
is this book for you? xix
how does this book work? xix
the discoveries xix
what to expect in each chapter xx
getting help: the companion website xx
conclusion xx

PART I GETTING STARTED

1
collecting the equipment for your robot **3**
what's in the box 3
the NXT brick 4
the NXT-G programming software 4
the test pad 5
inserting batteries 5
conclusion 6

2
building your first robot **7**
building the explorer 7
building tip: beams and axles 8
building tip: friction and nonfriction pins 8
connecting the cables 19
using the NXT buttons to navigate on the NXT brick 19
turning on the brick 20
selecting and choosing items 20
turning off the brick 20
running a program 21
conclusion 21

3
creating and modifying programs **23**
a quick first program 23
creating a basic program 25
1. programming palette 25
2. work area 26

3. start area 26
4. NXT controller 26
working with the NXT-G software 27
5. configuration panel 27
6. little help window 28
7. program navigation bar 28
8. toolbar 28
9. robo center 29
controlling the robot remotely 30
conclusion 30

4
working with programming blocks: move, sound, and display 31
what do programming blocks do? 31
using blocks to create programs 31
using different programming blocks 31
the move block 32
seeing the move block in action 32
understanding the configuration panel 33
Discovery #1: Accelerate! *34*
understanding the configuration icons 35
making accurate turns 35
Discovery #2: Looking Back! *35*
Discovery #3: Move That 'Bot! *35*
Discovery #4: RoboSpeller! *36*
the sound block 36
understanding the sound block configurations 36
seeing the sound block in action 37
Discovery #5: Which Direction Did You Say?! *38*
Discovery #6: Be the DJ! *38*
the display block 38
understanding the display block configurations 38
seeing the display block in action 40
further exploration 41
Discovery #7: Subtitles! *41*
Discovery #8: Navigator! *41*
Discovery #9: Circle Time! *42*
Discovery #10: W8 for the Explorer! *42*
Discovery #11: RoboDancer! *42*
Building Discovery #1: Exploring Art! *42*

5
waiting, repeating, and other programming techniques 43
the wait block 43
understanding the wait block settings 43
seeing the wait block in action 43
Discovery #12: Count Down! *44*

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

more on the move block: moving unlimited 44
the unlimited option 44
the duration unlimited setting in action 45
problems with moving unlimited 45
the loop block 46
using the loop block 46
understanding the loop block settings 47
seeing the loop block in action 47
Discovery #13: Guard the Room! 48
Discovery #14: Triangle! 48
using loop blocks within loop blocks 48
making your own blocks: the my block 48
creating my blocks 49
using my blocks in programs 49
Discovery #15: My Triangle! 50
Discovery #16: My Tune! 50
editing my blocks 50
parallel sequences of blocks 50
using parallel sequences in a program 50
Discovery #17: Let's Multitask! 51
Discovery #18: Complex Figures! 52
Building Discovery #2: Mr. Explorer! 52
further exploration 52

PART II BUILDING AND PROGRAMMING ROBOTS WITH SENSORS

6
understanding sensors 55
what are sensors? 55
understanding the sensors in the NXT 2.0 kit 55
Discovery #19: Mind Your Head! 56
understanding the ultrasonic sensor 56
creating the ultrasonic sensor attachment 56
polling sensors 56
programming with sensors 58
sensors and the wait block 58
Discovery #20: Hello and Goodbye! 59
sensors and the loop block 60
Discovery #21: Avoid Walls and a Bad Mood! 61
Discovery #22: Follow Me! 61
Discovery #23: Happy Tunes! 61
sensors and the switch block 62
Discovery #24: See the Distance! 63
Discovery #25: Stop or Turn? 64
Discovery #26: Intruder Alarm! 66
Discovery #27: Ultrasound! 66
Building Discovery #3: Railroad Crossing! 66
further exploration 66

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

7
using the touch, color, and rotation sensors 67
the touch sensor 68
creating the bumper attachment with touch sensors 68
programming with the touch sensor 73
avoiding walls with touch sensors 74
Discovery #28: Only Two Is Enough! *75*
Discovery #29: Smart Decisions! *75*
the color sensor 76
creating the color sensor attachment 76
using the view mode to poll the color sensor 78
programming with the color sensor 78
Building Discovery #4: Clean That Test Pad! *80*
Discovery #30: Tell Me What You See! *80*
Discovery #31: Expert Line Following! *82*
Discovery #32: Which Button Did You Press?! *82*
Discovery #33: SoundBot! *82*
using the NXT buttons as sensors 82
the rotation sensors 83
using the view mode to poll the rotation sensor 83
making programs with rotation sensors 83
Discovery #34: Circling Degrees! *83*
Discovery #35: Rotational Music! *84*
further exploration 85
Discovery #36: Color the Ball! *85*
Discovery #37: Ultrasonic Line Following! *85*
Building Discovery #5: Automatic House! *85*

8
shot-roller: a robotic defense system 87
building the shot-roller 88
connecting the cables 105
programming the shot-roller 105
the complete palette 105
the color lamp block 105
Discovery #38: A Colored Voice! *106*
the motor block 106
Discovery #39: A Motor Block Task! *107*
autonomous mode 108
light sensor mode 111
Discovery #40: Dangerous Intruder Alarm! *111*
remote-control mode 113
Discovery #41: Combining Sensor Power! *113*
further exploration 119
Discovery #42: Research with the NXT! *119*
Building Discovery #6: Look Before You Shoot! *119*
Building Discovery #7: Catapult! *119*

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

9
strider: the six-legged walking creature 121
building strider 122
connecting the sensor cables 134
understanding strider's walking technique 134
programming strider 135
creating the walk-forward my block 135
creating the walk-left and walk-right my blocks 136
using the my blocks in an interactive program 137
Discovery #43: Triangle Time, Again! *137*
Discovery #44: Walking in Six Directions! *141*
creating the scared strider program 142
further exploration 145
Discovery #45: Walking at the Speed of Light! *145*
Building Discovery #8: Tired of Walking?! *146*
Discovery #46: Remote Control! *146*
Building Discovery #9: A Pair of Eyes in the Back! *146*

PART III CREATING ADVANCED PROGRAMS

10
using data hubs and data wires 149
building SmartBot 150
a program to get started with data wires 156
understanding the sample program 157
how do data hubs and data wires work? 158
creating a second example program with data wires and data hubs 158
using data plugs: input and output 159
block configurations when using data wires 160
deleting data wires 160
Discovery #47: Growing Circles! *161*
Discovery #48: Dynamic Speed! *161*
Discovery #49: Motor Input! *162*
sensor blocks 162
configuring a sensor block 162
configuring a touch sensor block 162
configuring a color sensor block 162
configuring a rotation sensor block 163
data wire types 163
the number data wire 163
the logic data wire 163
Discovery #50: Touch Sensor Wires! *164*
the text data wire 164
Discovery #51: Read the Sensor Readings! *166*
the broken data wire 166

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

multiple data wire connections ... 166
connecting multiple wires to different plugs ... 166
connecting multiple wires to one data plug ... 167
using settings with both input and output plugs ... 167
Discovery #52: Multifunctional Wires! ... *167*
using help for data plugs ... 168
tips for managing data wires ... 169
hiding unused data plugs ... 169
using data wires across your program ... 169
Discovery #53: Looking for Help! ... *169*
Discovery #54: Turn Up the Volume! ... *170*
Discovery #55: Control the Throttle! ... *170*
Discovery #56: SmartBot Is Watching You! ... *170*
Building Discovery #10: A Polite SmartBot! ... *170*
further exploration ... 170

11
using data blocks and using data wires with loops and switches ... 171
data blocks ... 171
the math block ... 171
Discovery #57: Math Practice! ... *173*
Discovery #58: Random Sound! ... *174*
the random block ... 174
the compare block ... 175
the logic block ... 175
switch blocks and data wires ... 177
Discovery #59: And, Or, XOr, or Not? ... *177*
Discovery #60: Total or Else! ... *178*
configuring switch blocks with data wires ... 178
using number and text data wires and switch blocks ... 180
connecting data wires to inside switch blocks ... 180
loop blocks and data wires ... 180
Discovery #61: Press Any Key to Continue! ... *181*
Discovery #62: Arithmetic Rotations! ... *182*
Building Discovery #11: Bionic Hand! ... *182*
further exploration ... 182

12
using variables, constants, and playing games on the NXT ... 183
using variables ... 183
defining a variable ... 183
using the variable block ... 184
creating a program with a variable ... 185
Discovery #63: Old vs. New! ... *186*
Discovery #64: Smarter Count Program! ... *188*
using constants ... 188
using the constant block ... 188
creating a program with constants ... 188

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

playing a game on the NXT 190
defining the variables 190
step 1: displaying a target randomly 191
step 2: waiting until a button is pressed 191
step 3: storing which button is pressed 191
step 4: comparing the position and button variables 192
step 5: adjusting the score 192
step 6: displaying the current score 193
step 7: making the program repeat for 30 seconds 193
expanding the program 193
Discovery #65: Smart-Game Program Advanced! *194*
Discovery #66: Brain Trainer! *194*
Building Discovery #12: Whack-a-Mole! *194*
further exploration 194

PART IV ADVANCED ROBOT PROJECTS

13
snatcher: the autonomous robotic arm 197
understanding the grabber 197
the grabbing mechanism 198
the lifting mechanism 198
building the snatcher 200
creating objects 231
programming the snatcher 231
creating the my blocks 231
creating the final program 234
troubleshooting the snatcher 235
further exploration 235
Discovery #67: I Don't Like Blue! *235*
Discovery #68: Light in a Corner! *235*
Building Discovery #13: Tabletop Cleaner! *235*

14
hybrid brick sorter: sort bricks by color and size 237
understanding the sorting technique 238
the driving module 238
the scanning module 238
identifying a brick's size 238
building the hybrid brick sorter 239
connecting the cables 259
finding bricks to use with your sorter 259
finding buckets 259
programming the hybrid brick sorter 259
creating the my blocks 260
creating the final program 261
Discovery #69: High-Speed Sorting! *264*
Discovery #70: Quatro Brick Sorter! *264*

The LEGO MINDSTORMS NXT 2.0 Discovery Book
(C) 2010 by Laurens Valk

Discovery #71: Intelligent Sorting! *264*
Building Discovery #14: Hybrid Brick Shooter! *264*
further exploration 264

15
CCC: the compact chimney climber 265
understanding the climbing technique 266
staying balanced on the x-axis 266
balancing on the y-axis 267
building the compact chimney climber 268
preparing a chimney 280
programming the compact chimney climber 280
step 1: extending the arms 280
step 2: climbing and staying balanced 280
step 3: going down, staying balanced, and stopping 282
troubleshooting the CCC 282
further exploration 283
Discovery #72: Altimeter! *283*
Building Discovery #15: Aerial Tram! *283*

appendix
troubleshooting and solving connection problems 285
using the NXT controller to download programs to the NXT 285
using the NXT window 286
problems connecting to an NXT with USB 286
problems downloading programs to the NXT 287
using Bluetooth to download programs to the NXT 288
finding a Bluetooth dongle 288
connecting to the NXT with Bluetooth 289
problems connecting to an NXT with Bluetooth 289
conclusion 289
