

CONTENTS IN DETAIL

ACKNOWLEDGMENTS	xvii
------------------------	-------------

INTRODUCTION	1
Book Organization and Conventions	3
Company Growth Stages	3
Real-Life Accounts	3
Spreadsheets	4
Templates.	5

PART I DEVELOPMENT TEAM

1	
GETTING STARTED	9
Finding Your Way in a New Job	10
Dealing with the Immediate	11
Undergoing Initial Training.	13
Collecting Information	14
Understanding the People	16
Reluctance to Reveal Information	17
Learning the Technology, Process, and Product	19
Understanding the Customer	21
Understanding the Corporate Business Workflow	22
Back to the Big Picture	23

2	
MANAGING A DEVELOPMENT TEAM	25
Understanding Your Core Management Values	26
Trust	26
Flexibility	29
Sincerity.	30
Confidentiality	31
Respect	32
Empowerment.	32
Communicating with Your Team.	33
One-on-Ones	34
Project Communication	35
Team Meetings.	36

Conflict Resolution	37
Training	39
Coaching	40
Motivating Your Team Members	42
Coaching Problem Employees	44
Reviews and Evaluations	46
Creating the Review	47
Delivering the Review	48
Providing Late and Deficient Reviews	48
Additional Reading	50

3 CREATING AN EFFECTIVE DEVELOPMENT TEAM 51

Effective Team Organization	52
Programmer Efficiency	56
Office Space	58
How Other Teams Communicate with Engineering	59
New Manager, Old Habits	61
Have Fun	63
Additional Reading	63

4 GROWING A SOFTWARE TEAM 65

Designing a Selection Process	66
Interview Traits	67
Technical Skills	67
Success History	68
Cultural Fit	69
Work Habits and Preferences	70
Industry Experience	70
People Skills	71
Communication Skills	71
Personality	71
Enthusiasm	72
Problem-Solving Ability	72
Sense of Humor	73
Pulling It All Together	73
Phone Screening	73
The Office Interview	74
Coaching Your Interview Team	75
Interview Sessions to Avoid	76
Review Session	79
Making the Choice	80
Additional Reading	81

PART II PRODUCT AND TECHNOLOGY

5		
DEFINING THE PRODUCT		85
Product Definition Process		86
Product Definition Contents		89
The Whole Product Concept		91
Define the Product Using Prototypes		93
Prototypes in General		94
Quick and Nimble Approaches		94
Clickable User Interface Prototypes		95
User Interface Design		96
Build a Relationship with Marketing		97
Avoid Poor Relationships		98
Keep Marketing and Engineering Teams Together		99
Build a Balanced Relationship		99
Customer Perception of the Product		100
Surprise! Unplanned Features		102
Improving a Product in an Alpha Release		104
Understanding an Existing Product's Composition		105
Additional Reading		107
6		
DRIVING RELEASES		109
Release Planning		110
Release Timeline		111
Early Release Strategy		112
Planning Product End of Life		116
The Release Process		119
Release Criteria		119
Process Steps		121
Post-release Review		123
Release Version Identification		124
Three-Number Release IDs		125
Patch Releases		127
Component Numbers vs. Release Numbers		127
Numbering Across Releases		128
Software for the Gentleman Farmer		130
Additional Reading		132

7		
	EVALUATING YOUR TOOLS AND METHODS	133
	Backing Up Intellectual Property	135
	Backup Frequency	136
	Offsite Copies	138
	Disk-Only Backup	139
	Creating and Managing Development Documentation	140
	Source Control Versioning	142
	Software Build Method and Timing	145
	Software Release Process	147
	Bug-Tracking System	149
	Selecting the Right Development Tools	151
	Additional Reading	154

8		
	ASSESSING YOUR TECHNOLOGY	155
	System Documentation	156
	System Scalability	158
	Failure Modes	160
	Error Handling and Messages	162
	Software System Flexibility and Maintainability	164
	Third-Party Packages Integrated into the System	165
	System Application Programming Interface	167
	Security	167
	Data Reporting and Analysis	169
	Data Warehouse	170
	International Support	171
	Looking at the Big Picture	172
	Additional Reading	172

PART III OUTSIDE OF ENGINEERING

9		
	WORKING WITH YOUR COMPANY	177
	Company Culture and Practices	178
	Corporate Style	179
	Management Style	180
	Meeting Style	180
	Handling Interteam Problems	184
	Growing Peer Relationships	186
	Engineering Team Respect	188
	Additional Reading	189

10		
WORKING WITH THE CEO AND THE EXECUTIVE TEAM		191
Supporting Your Boss		192
Ensuring Clarity of Goals		193
Providing Useful Information		194
Communicating		195
Influencing Decisions		196
Collaborating with the Executive Team		197
Resolving Conflict		197
Taking up Your Mantle with Confidence		198
Opening Communication		199
Collaborating Effectively		201

11		
LISTENING TO YOUR CUSTOMERS		203
Customer Satisfaction		204
Customer Meetings		206
Closing the Deal		206
When the Sales Team Overpromises		208
Requests for Quotes		209
Support and Customer Requests		212

PART IV
MAKING WORK FLOW: PROJECTS, PROCESS,
AND QUALITY

12		
PROJECT ESTIMATING		217
Building an Estimate		218
Creating a Task List		218
Creating Task Estimates		220
Considering Estimation Bias		221
Building the Estimate		222
Writing and Delivering the Estimate		224
Collecting Raw Project Data		226
Summarizing Data Using a Spreadsheet		228
Engineering Maintenance and Overhead		229
Additional Reading		231

13		
STARTING A PROJECT		233
Understanding the Goal		234
Assembling the Project Team		235
Substitutions		236
Game Delays		237
Setting Priorities		238
Selecting the Framework		239
Mapping out the Timeline		240
Creating a Project Plan		240
Kickoff Meeting		242
Additional Reading		243
14		
PROJECT EXECUTION AND TRACKING		245
Managing a Project's Execution		246
The Five Rules of Project Management		246
Project-Tracking Approaches		249
Gantt Chart		250
Project-Tracking Spreadsheet		255
Change Control Process		259
Risk Management		261
Additional Reading		265
15		
DESIGNING A SOFTWARE DEVELOPMENT PROCESS		267
What's in a Software Development Process?		268
Types of Development Processes		269
Ad Hoc		270
Waterfall Process		270
Modified Waterfall Process		271
Iterative Process		273
Spiral Process		274
Agile Processes		275
Other Processes and Approaches		279
Customizing a Process		279
Selecting a Process		281
Introducing a Process		281
Additional Reading		284
16		
PROCESS IMPROVEMENT		287
Creating a Process Model		288
Define the Process Boundaries		289
List the Process Steps		289
Create a Flow Chart		289
Estimate a Range of Times		289

Create a Spreadsheet Model	290
Verify the Model	291
Analyzing the Process Model	291
Process Analysis in Action	291
Using the Model to Improve the Process	295
Working with Other Teams	298
Getting It Going	299
Additional Reading	299

17
UNDERSTANDING QUALITY ASSURANCE **301**

Importance of Quality	302
Quality Defined	303
Valuing Quality	304
Quality Assessment	306
The Quality Assurance Team	307
QA Tools and Environment	309
QA Activities	314
QA Processes	319
Defect-Ranking Process	319
Functionality and Usefulness as Specified and Built	320
QA Metrics	324
The Impact of Defects on Quality and Productivity	330
Additional Reading	333

PART V
PLANNING THE FUTURE

18
SETTING THE DIRECTION **337**

Listen to the Market	338
Create a Whole Product	340
Defuse Technical Time Bombs	341
Plan a Technology Overhaul	343
Optimize Customer Setup	344

19
PRODUCT ROADMAP AND STRATEGY **349**

Creating a Product Roadmap	351
Evaluating Choices	351
Cost-Benefit Calculation	353
Cost-Benefit Comparisons	354
Creating One-Page Assessments	356
Project Components	357
Additional Reading	358

20	GOING FORWARD	359
A	SOFTWARE COMPANY STRUCTURE	361
	Company Tasks	362
	Typical One-Person Company	363
	Typical Two-Person Company	364
	Twelve-Person Software Company	365
	Twenty-four to Fifty-Person Software Company	366
	Hundred-Plus-Person Software Company	368
	Hierarchical Structure	369
	Matrix Organizations	370
	Small Product Team	372
	Flexible Project Teams	374
	Conclusion	375
B	INTERNATIONALIZATION	377
	Internationalization Questions to Ask	378
	Translating Staffing and Costs	379
	Database Considerations	379
	Country and Language Requirements	380
	Currency Questions	380
	Dates, Metric, and Dimension Issues	381
	Best Practice Approach to Internationalization	381
	Locales	381
	Translation Process	382
	Quality Assurance	382
	Database and Import/Export	382
	Translation Firm	382
	User Interface	383
	Summary	384
C	CORPORATE WORKFLOW DIAGRAM	385
	Creating a Simple Workflow Diagram	386
	Workflow Example	386
	INDEX	391
