Errata for *Linux Basics for Hackers* (updated to 8th printing)

Note: The 4th printing included substantial changes to the text. The following list includes only errata from the 5th through 8th printings.

**Page xxxii:** At the end of the last paragraph, we added the sentence: “Beginning with Kali 2020 and later versions, Kali provides you a username and password set to Kali.”

**Page xxxvi:** At the end of the first paragraph, we added the sentences: “If you are using Kali 2020 or later, you will need to use the sudo before any command that requires root privileges. These later versions of Kali will respond with ‘command not found’ when the command requires root privileges. Simply precede the command with sudo.”

**Page 12:** In the first code block, the line that reads:

`kali >find /etc -type f --name apache2.*`

should now read:

`kali >find /etc -type f -name apache2.`

**Page 99:** The command that reads:

`kali >dd if=/dev/media of=/root/flashcopy bs=4096 conv:noerror`

should now read:

`kali >dd if=/dev/media of=/root/flashcopy bs=4096 conv=noerror`

**Page 159:** The `aireplay-ng` command that reads:

`aireplay-ng --deauth 100 -a 01:01:AA:BB:CC:22-c A0:A3:E2:44:7C:E5 wlan0mon`

should now read:

`aireplay-ng --deauth 100 -a 01:02:CC:DD:03:CF -c A0:A3:E2:44:7C:E5 wlan0mon`

**Page 189:** The third line of code on the page that reads:

`HackersAriseDictionary = {'name': 'OccupyTheWeb', 'value' : 27}`

should now read:

`HackersAriseDictionary = {'name': 'OccupyTheWeb', 'value' : 27}`
