<b>introduction</b> .....	<b>xvii</b>
about this book.....	xvii
part I: introduction to LEGO MINDSTORMS NXT 2.0.....	xviii
part II: building .....	xviii
part III: programming .....	xviii
part IV: projects .....	xix
companion website .....	xix

## **PART I INTRODUCTION TO LEGO MINDSTORMS NXT 2.0**

<b>1</b>	
<b>LEGO MINDSTORMS NXT 2.0: people, pieces, and potential</b> .....	<b>3</b>
building a robot.....	3
programming a robot.....	5
activating a robot .....	7
what can I create with my NXT 2.0 set?.....	7
conclusion.....	7
<b>2</b>	
<b>getting started with the NXT 2.0 set</b> .....	<b>9</b>
requirements.....	9
six AA batteries .....	9
a PC or mac.....	9
bluetooth technology (optional) .....	9
getting a quick start.....	10
installing the NXT software.....	11
using the NXT software.....	11
getting started with NXT-G.....	11
the robo center.....	16
my portal .....	17
organizing the pieces.....	17
conclusion.....	18

## PART II BUILDING

<b>3</b>		
<b>understanding the electronic pieces .....</b>		<b>21</b>
the NXT .....		21
output (motor) ports and the USB port .....		22
the input (sensor) ports .....		22
bluetooth capability.....		23
a loudspeaker .....		23
buttons and the LCD.....		23
the servo motors .....		25
the sensors.....		25
passive sensors.....		25
digital sensors .....		26
connecting the electronic pieces with electrical cables.....		28
getting NXTreme .....		29
conclusion.....		29
<b>4</b>		
<b>understanding the LEGO MINDSTORMS NXT 2.0 pieces.....</b>		<b>31</b>
introduction to the pieces .....		31
classifying the pieces.....		32
naming the pieces .....		32
measuring the pieces .....		32
examining the pieces.....		33
the electronics.....		33
the beams.....		33
the connectors.....		36
the gears.....		41
the miscellaneous elements .....		43
conclusion.....		44
<b>5</b>		
<b>building sturdy structures .....</b>		<b>45</b>
extending beams .....		45
widening beams .....		46
forming corners.....		47
creating angled structures.....		47
creating dynamic structures .....		48
creating flexible structures.....		48
conclusion.....		49
<b>6</b>		
<b>building with gears .....</b>		<b>51</b>
the gear train.....		51
controlling a gear train's performance.....		54
the gear ratio .....		54
gearing down: more torque and less speed.....		55

gearing up: more speed and less torque.....	55
compound gearing: achieving greater torque or speed.....	56
achieving optimal performance .....	57
assembling LEGO gear trains.....	57
spacing gears on parallel axles.....	57
spacing gears on perpendicular axles.....	60
conclusion.....	62

## **PART III PROGRAMMING**

### **7**

<b>introduction to NXT-G.....</b>	<b>65</b>
starting an NXT-G program.....	65
the NXT-G interface .....	67
the menu bar.....	67
the toolbar.....	69
the work area .....	69
the programming palette.....	70
the configuration panel.....	70
the controller.....	71
the little help window and the work area map.....	72
fundamental NXT-G concepts.....	72
the starting point.....	72
sequence beams .....	73
managing programming blocks in the work area .....	75
navigating the work area.....	76
increasing program readability with comments .....	76
the common palette.....	77
the move block.....	77
the record/play block.....	80
the sound block.....	80
the display block.....	82
the wait block.....	83
the loop block.....	84
the switch block .....	86
conclusion.....	87

### **8**

<b>advanced NXT-G programming.....</b>	<b>89</b>
data wires.....	89
data plug characteristics .....	90
the wire path .....	92
transmitting the data types.....	92
broken data wires.....	92
the complete palette.....	93
the common blocks .....	94
the action blocks.....	94
the color lamp block.....	96

the sensor blocks.....	97
the flow blocks .....	98
the data blocks.....	99
the constant block.....	103
the advanced blocks.....	104
the custom palette.....	107
the my blocks.....	107
the web blocks.....	109
conclusion.....	109

## 9

<b>NXT-G tools.....</b>	<b>111</b>
calibrate sensors.....	111
update NXT firmware .....	112
create pack and go.....	113
block import and export wizard.....	113
image editor.....	115
remote control.....	116
sound editor.....	117
conclusion.....	118

## PART IV PROJECTS

### 10

<b>the MINDSTORMS method .....</b>	<b>121</b>
hitting the target with the MINDSTORMS method .....	121
step 1: getting an idea for a robot.....	121
step 2: building the robot.....	122
step 3: programming the robot .....	122
step 4: documenting the robot.....	123
conclusion.....	123

### 11

<b>inventor-bot: a vehicle with treads.....</b>	<b>125</b>
building inventor-bot.....	126
connecting the cables.....	137
programming inventor-bot.....	137
driving straight and turning.....	137
making the robot interactive.....	138
conclusion.....	138

### 12

<b>sentry-bot: an intruder detector .....</b>	<b>139</b>
adding the ultrasonic sensor.....	139
avoiding objects.....	141
following an object in a straight line .....	141

the shooter extension.....	142
testing the shooter.....	146
creating the complete sentry program.....	146
conclusion.....	147
<b>13</b>	
<b>table-bot: an edge-avoiding robot.....</b>	<b>149</b>
creating the antennae attachments.....	149
programming table-bot.....	155
keeping track of events.....	156
getting out of corners.....	157
conclusion.....	158
<b>14</b>	
<b>the jeep: a front-wheel drive vehicle.....</b>	<b>159</b>
understanding the jeep design.....	160
steering with the front wheels.....	160
driving with the front wheels.....	160
moving around with the jeep's front-wheel drive.....	160
understanding the wheel speeds.....	161
calculating the wheel speeds.....	161
building the jeep.....	162
programming the jeep.....	182
jeep program essentials.....	182
creating the wall-avoidance program.....	184
following a line.....	186
line-following basics.....	189
line following with the jeep.....	189
creating the line-following program.....	189
further explorations for the jeep.....	191
idea #1: headlights.....	191
idea #2: remote control.....	191
idea #3: parking sensor.....	191
conclusion.....	192
<b>15</b>	
<b>the lizard: a color-sensitive reptile.....</b>	<b>193</b>
understanding how the lizard walks.....	194
using one motor to control two legs.....	194
controlling four legs to produce walking.....	194
making turns.....	194
building the lizard.....	195
building the body.....	196
attaching the cables.....	214
building and attaching the legs.....	216
programming the lizard.....	226
synchronizing the motors with touch sensors.....	226
creating the my blocks.....	226
creating the final program.....	228

exploring the lizard further.....	230
idea #1: more behavior.....	230
idea #2: create your own animal.....	230
conclusion.....	230
<b>16</b>	
<b>the printer: a drawing machine.....</b>	<b>231</b>
understanding how the printer works.....	231
components of the printer.....	231
non-LEGO requirements for the printer.....	232
building the printer.....	233
connecting the cables.....	265
programming the printer.....	266
creating the my blocks.....	266
testing and troubleshooting the printer.....	271
troubleshooting the printer.....	272
creating the final program.....	272
exploring the printer further.....	274
idea #1: progress update.....	274
idea #2: morse code.....	274
idea #3: data logging.....	274
conclusion.....	274
<b>A</b>	
<b>LEGO MINDSTORMS NXT 2.0 piece library.....</b>	<b>275</b>
<b>B</b>	
<b>NXT-G 2.0 quick reference.....</b>	<b>291</b>
<b>C</b>	
<b>internet resources.....</b>	<b>299</b>
general resources.....	299
programming resources.....	300
bluetooth resources.....	300
NXT blogs.....	300
