

Sequence Wires, 80

Servo Motors, 14

- connecting to ports, 24
- multiple outputs from single motor, 127
- speed
 - maximum, 297
 - measuring precisely, 297
 - regulation, 188

sets. *See* EV3 sets

setup of EV3 Software, 69

sign (mathematical function),
implementation, 242

sine, 97

size. *See* measuring

sleeve of the box, 5

SM (state machine), 367–371

snaking, way of laying out programs, 79

Sound block, 55, 81, 93, 186, 235,
300, 364

speed

- of rotation, changing with gears, 111
- of Servo Motors, 14. *See also* Servo Motors: speed

spherical joints, 8

spool, wire (cursor), 87

square root, 92, 97

stalled motor, and how to prevent, 14

state machine (SM), 367–371

state variable, of a state machine, 370

static equilibrium, 131

Start block, 73, 76, 234

steering assembly, for SUP3R CAR,
216–217

steering car, kinematic model, 231–232

Steering input of Move Steering block, 77

Stop Program block, 245, 246

straight, driving, 54, 217

straight beams, 7

studless building, 5

sturdy structures, 104–109

subtraction (Math block), 92

sum (Math block), 92

SUP3R CAR

- building, 191–221
- building R3MOTE for, 222–227
- programming, 235–246

Switch block, 82, 83, 91, 99, 184, 370

- using with multiple cases, 234

swords (decorative pieces), 13

T

tangent (trigonometric function), 96

tea, algorithm to prepare, 47

technical specifications of the EV3 Brick, 13

Technic elements, 6–13

teeth (decorative pieces), 12, 347, 351

test pad, 5

Text block, 88–89

text-to-numeric conversion, 303

Theorem, Pythagorean, 103, 261

thin beams, 8

third-party sensors, 74

Timer block, 184–185, 187, 299, 370–371

toe, of steering wheels, 217

tools in EV3 Software, 72

torque

- definition, 111
- increasing, 111, 159
- running, 14
- of Servo Motors, 14
- stall, 14

Touch Sensor, 14, 25

Touch Sensor block, 185, 299, 300

T-R3X

- behavior design, 366
- building, 309–357
- programming to hunt, 363–366,
373–378
- programming to wander, 363–367

tracking, of steering wheels, 217

transforming motion, 121, 255, 352

transitions, of a state machine, 370

travelling by a precise distance, 78

treads, 12

- ROV3R with, 40–43

trigonometric functions, 96–97

troubleshooting Bluetooth connection, 76

troubleshooting WATCHG00Z3, 178

truncating a decimal number, 96

turning

- exploiting the conservation of angular momentum, 365
- kinematic model of a steering car,
231–232
- by a precise number of degrees, 79

types of data, 89

U

uniform distribution of random
numbers, 296

Unregulated Motor block, 184

untangling Data Wires, 87

updating a Sequence Wire, 80

updating the firmware of the EV3 Brick, 73

USB

- cable (USB-to-miniUSB), 5
- connection on the EV3 Brick, 75
- port, 14

user guide, accessing from
EV3 Software, 69

V

Variable block, 232–233

variable, state (of a state machine), 370

versions

- of EV3 set. *See* EV3 sets
- of EV3 Software, 389

W

Wait block, 77, 81, 98, 298

walking base, of the SENTIN3L, 262

walking technique, for WATCHG00Z3, 131

wall-following programs, 64–65, 98–100

Wall-Following ROV3R, 32–33

WATCHG00Z3

- Brick Program, 177–178
- building, 131–174
- programming with EV3 Software,
178–187
- troubleshooting, 178

websites
