GREEBLE GURU

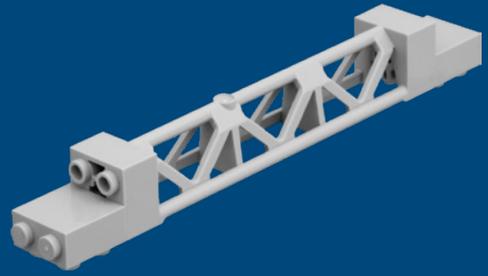

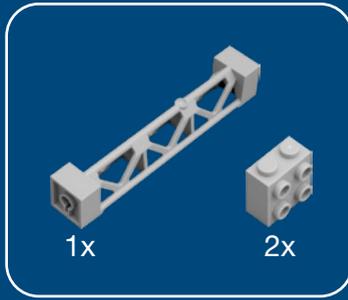

Do you like a starship's hull festooned with gizmos that have no obvious function? The Greeble Guru scientific research vessel meets your expectations. Be assured that every Greeble Guru gadget is used to conduct experimental work, such as flatworm tissue regeneration, robot anthropomorphizing, and warp effects on ant farms. The telescope level is equipped with a lounge that is secretly a lab monitoring awkward social interactions among science officers.

TYPE	Science
CREW	2 pilots, 12 engineers, 50 science officers, 160 graduate students, 10 stewards, 6 robotics techs, 16 lab assistants, 1 philosopher
PROPULSION	2 Plasma Pulse Warpors, 3 ion-maneuvering thrusters
SPECIAL	Docking for Bounce Buggies
MANUFACTURER	Clever Hypothesis

The truncated cones are attached identically on both sides. The right rear truncated cone is hidden in this view.

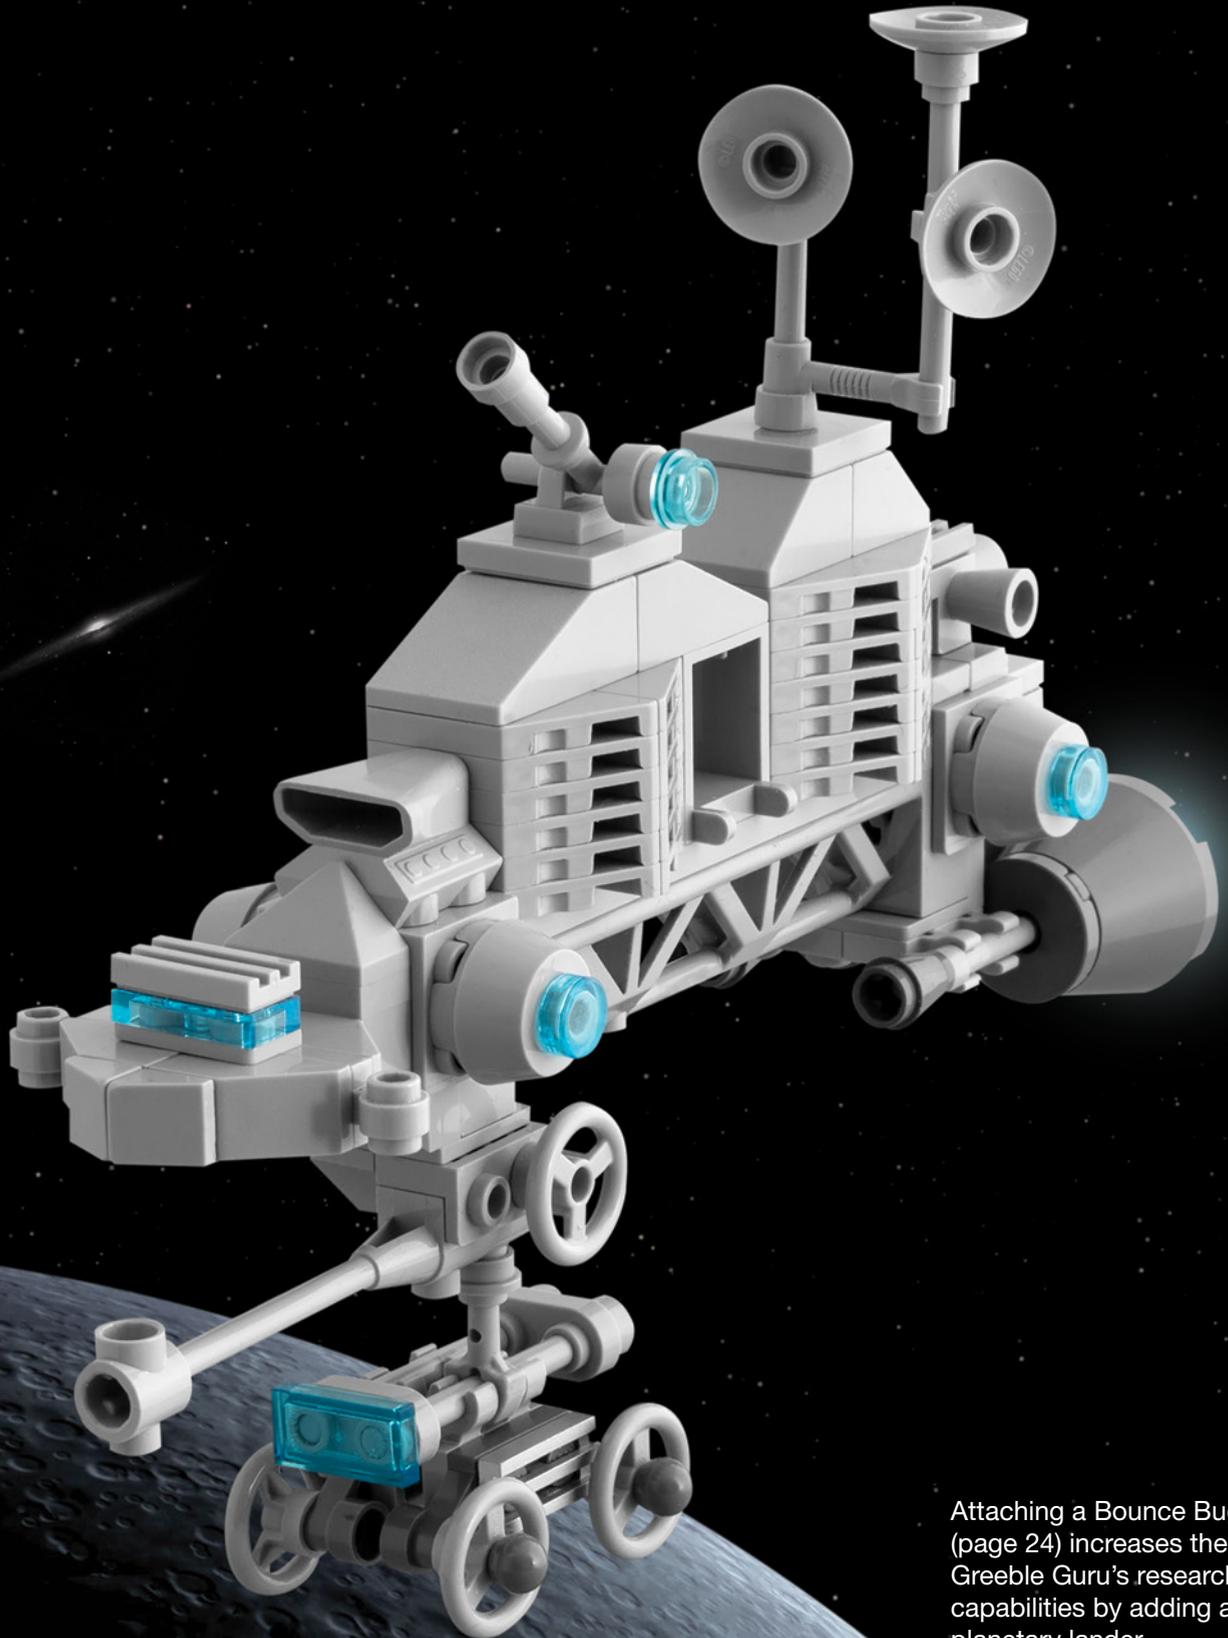

14

The transparent blue round tiles are attached identically on both sides. The right rear round tile is hidden in this view.

Attaching a Bounce Buggy (page 24) increases the Greeble Guru's research capabilities by adding a planetary lander.
