

BRIEF CONTENTS

Acknowledgments	xiii
Introduction	xv
Chapter 1: Building Apps with App Inventor	1
Chapter 2: App Inventor and Event-Driven Programming	23
Chapter 3: Fruit Loot: Creating a Simple Animated Game	37
Chapter 4: Multiplication Station: Making Decisions with Code	59
Chapter 5: Beat the Bus: Tracking Location with Maps and Sensors	83
Chapter 6: Tic Tac Toe: Using Loops to Create a Game	101
Chapter 7: Multiplication Station II: Reusing Code with Procedures	125
Chapter 8: Virtual Shades: Drawing and Dragging Images	141
Appendix: App Inventor Components and Built-in Blocks	161
Index	171

CONTENTS IN DETAIL

ACKNOWLEDGMENTS XIII

INTRODUCTION XV

What Is App Inventor?	xvi
Who Should Read This Book?	xvi
What's in This Book?	xvii
How to Use This Book.	xviii
Getting Started with App Inventor	xviii
Live-Testing Your Apps	xxii
Connecting Your Phone to the Computer	xxii
Using the Onscreen Emulator	xxiii
A Note on Conventions	xxiii
Handling Duplicate Components.	xxiv
Appearance of Block Inputs	xxiv
Apps Created on Windows	xxiv

1 BUILDING APPS WITH APP INVENTOR 1

Planning a New App	2
Laying Out Your App	2
Programming Your App in the Blocks Editor.	3
Building the "Hi, World!" App.	4
Decomposing "Hi, World!"	5
Laying Out "Hi, World!" in the Designer	6
Programming "Hi, World!" in the Blocks Editor.	15
Sharing "Hi, World!"	20
Summary	20
On Your Own	21

2 APP INVENTOR AND EVENT-DRIVEN PROGRAMMING 23

Building the "Practice Makes Perfect" App	24
Decomposing "Practice Makes Perfect"	25
Laying Out "Practice Makes Perfect" in the Designer	25

Programming “Practice Makes Perfect” in the Blocks Editor	31
Step 1: Starting the App	32
Step 2: Opening the Video Recorder	33
Step 3: Choosing the Video Clip to Play	34
Step 4: Playing the Video Clip	35
Summary	35
On Your Own	36

3

FRUIT LOOT: CREATING A SIMPLE ANIMATED GAME 37

Animating and Moving Randomly	38
Programming Moving Images	38
Setting Up Random Appearance, Speed, and Location	39
Declaring and Initializing Variables	40
Building the “Fruit Loot” App	40
Decomposing “Fruit Loot”	41
Laying Out “Fruit Loot” in the Designer	41
Adding and Arranging User Interface Components	42
Setting Up the Canvas and ImageSprites	43
Adding and Preparing Non-Visible Components	43
Programming “Fruit Loot” in the Blocks Editor	44
Step 1: Starting the Game	45
Step 2: Making Fruit Drop at Random	46
Step 3: Creating More Falling Fruit and Counting Dropped Fruit	48
Step 4: Letting Players Move the Picker to Catch the Fruit	53
Step 5: Hiding Caught Fruit and Keeping Score	55
Summary	58
On Your Own	58

4

MULTIPLICATION STATION: MAKING DECISIONS WITH CODE 59

The Selection Control Structure	60
Using an if then Block in the “Fruit Loot” Game	60
Building the “Multiplication Station” App	62
Decomposing “Multiplication Station”	63
Laying Out “Multiplication Station” in the Designer	64
Setting Up the Welcome Screen	64
Creating the Practice Screen	65
Programming “Multiplication Station”	67
Step 1: Playing the Welcome Message	67
Step 2: Moving to the Practice Screen	68
Step 3: Displaying Random Multiplication Problems	69
Step 4: Checking Answers	72
Step 5: Ending Practice and Showing the Final Score	77
Testing the App	80
Summary	80
On Your Own	81

5 BEAT THE BUS: TRACKING LOCATION WITH MAPS AND SENSORS 83

Building the “Beat the Bus” App	84
Decomposing “Beat the Bus”	84
Laying Out “Beat the Bus” in the Designer	85
Programming “Beat the Bus”	87
Step 1: Choosing the Phone Number to Text	87
Step 2: Choosing the Destination	89
Step 3: Starting Location Tracking	91
Step 4: Tracking the Journey	96
Summary	100
On Your Own	100

6 TIC TAC TOE: USING LOOPS TO CREATE A GAME 101

Using Loops in App Inventor	101
The for each number Loop	102
The while Loop	102
The for each item Loop	103
Building the “Tic Tac Toe” App	104
Decomposing “Tic Tac Toe”	104
Laying Out “Tic Tac Toe” in the Designer	104
Programming “Tic Tac Toe”	106
Step 1: Setting Up the Tic Tac Toe Game Board	106
Step 2: Responding to Player Moves	111
Step 3: Programming the Reset Button	121
Testing the App	122
Summary	123
On Your Own	123

7 MULTIPLICATION STATION II: REUSING CODE WITH PROCEDURES 125

Procedures Can Take Parameters	126
Creating Your Own Procedure	126
Defining the Parameters	128
Calling the Procedure	130
Building the “Multiplication Station II” App	131
Decomposing “Multiplication Station II”	131
Laying Out “Multiplication Station II” in the Designer	132
Programming “Multiplication Station II”	133
Step 1: Setting Problem Level Choices and Playing the New Welcome Message	133
Step 2: Stating the Number of Seconds for Each Problem and Opening the Practice Screen	135
Step 3: Displaying the Practice Problems	137
Summary	139
On Your Own	140

8

VIRTUAL SHADES: DRAWING AND DRAGGING IMAGES 141

Building the “Virtual Shades” App	141
Decomposing “Virtual Shades”	142
Laying Out “Virtual Shades” in the Designer	143
Programming “Virtual Shades” in the Blocks Editor	145
Step 1: Setting the Selfie as the Canvas Background	146
Step 2: Adding Sunglasses to Choose From	147
Step 3: Selecting a Pair of Sunglasses to Try	148
Step 4: Trying On Sunglasses	151
Step 5: Letting Users Draw on the Canvas	154
Step 6: Letting Users Type on the Canvas	156
Step 7: Letting Users Save a Picture of the Canvas	158
Step 8: Letting Users Clear the Canvas	159
Summary	160
On Your Own	160

APPENDIX

APP INVENTOR COMPONENTS AND BUILT-IN BLOCKS 161

App Inventor Components	161
User Interface Components	162
Layout Components	163
Media Components	164
Drawing and Animation Components	165
Maps Components	165
Sensors Components	166
Social Components	167
Storage Components	167
Connectivity Components	168
Other Components	168
App Inventor’s Built-in Blocks	168
