INTRODUCTION	xvii
---------------------	-------------

Who This Book Is For	xviii
Overview	xix
Help and Support.	xix

1	
PRIMITIVE AND REFERENCE TYPES	1

What Are Types?	2
Primitive Types	3
Identifying Primitive Types	4
Primitive Methods.	6
Reference Types	6
Creating Objects	6
Dereferencing Objects	7
Adding or Removing Properties	8
Instantiating Built-in Types	8
Literal Forms	9
Object and Array Literals	9
Function Literals	10
Regular Expression Literals	11
Property Access	11
Identifying Reference Types	12
Identifying Arrays.	13
Primitive Wrapper Types.	14
Summary	16

2	
FUNCTIONS	17

Declarations vs. Expressions	18
Functions as Values	19
Parameters	21
Overloading	23

Object Methods	24
The this Object	25
Changing this	26
Summary	29

3 UNDERSTANDING OBJECTS 31

Defining Properties	32
Detecting Properties	33
Removing Properties	35
Enumeration	36
Types of Properties	37
Property Attributes	38
Common Attributes	39
Data Property Attributes	40
Accessor Property Attributes	41
Defining Multiple Properties	43
Retrieving Property Attributes	44
Preventing Object Modification	45
Preventing Extensions	45
Sealing Objects	45
Freezing Objects	47
Summary	48

4 CONSTRUCTORS AND PROTOTYPES 49

Constructors	49
Prototypes	53
The [[Prototype]] Property	54
Using Prototypes with Constructors	57
Changing Prototypes	60
Built-in Object Prototypes	62
Summary	63

5 INHERITANCE 65

Prototype Chaining and Object.prototype	65
Methods Inherited from Object.prototype	66
Modifying Object.prototype	68
Object Inheritance	69
Constructor Inheritance	72

Constructor Stealing	75
Accessing Supertype Methods	77
Summary	78

6
OBJECT PATTERNS **79**

Private and Privileged Members	80
The Module Pattern	80
Private Members for Constructors	82
Mixins	84
Scope-Safe Constructors	90
Summary	92

INDEX **93**
