

CLASSIC SKYSCRAPERS

INSTRUCTIONS FOR BUILDING THE COMPLETE CITY

JEFF FRIESEN

HOW TO USE THIS BOOK

In the pages ahead, you'll find instructions for building the entire Classic Skyscrapers city, including its heavy base of stratified geology. Big journeys are best broken into small chunks, so the instructions are divided into sections for the city's seven buildings, its bridge, the river barge, and the base.

You are free, of course, to use the buildings separately, or to incorporate them as features in your own city build. You can also rearrange the buildings on a custom-made base of your own design. Modular freedom

is the essence of LEGO, and you are encouraged to make your own creative choices.

A good place to begin customizing is the base. Tall, thick bases have become a trademark of my builds, but reducing the base's thickness can save you a significant number of bricks and a fair amount of work. This city's base measures 22 × 22 studs, but it can be expanded however you like.

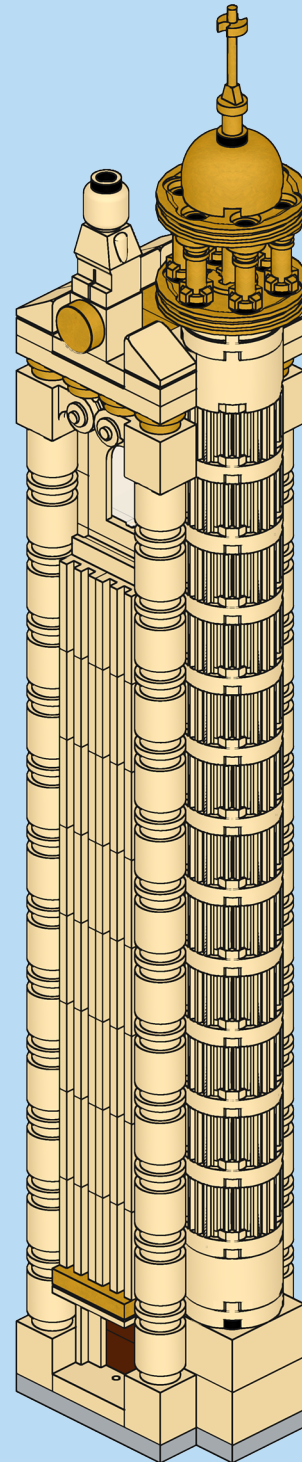

Happy building!

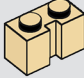

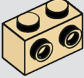

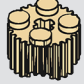

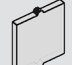

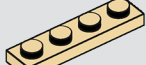

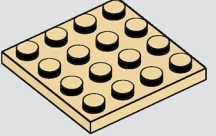

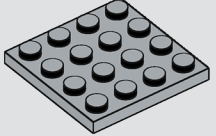

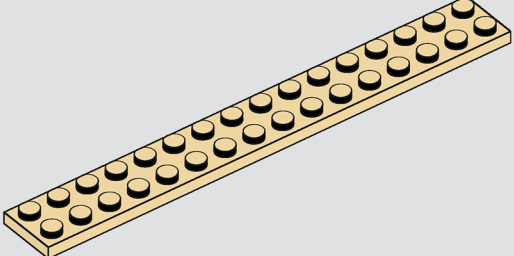

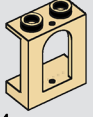

TABLE OF CONTENTS

BUILD 1: CLOUD CASTLE	4
BUILD 2: BRICKWORKS	16
BUILD 3: GRAYSTONE TOWER	26
BUILD 4: THE SHINING GATE	40
BUILD 5: GOTHIC HEIGHTS	60
BUILD 6: GOLDEN TOAD BANK	68
BUILD 7: CORNERSTONE COMMONS	76
BUILD 8: BRICKWELL MANOR	84
BUILD 9: RIVER BARGE	90
BUILD 10: THE BASE	94
BUILD 11: THE CITY	160
