CONTENTS IN DETAIL

FOREWORD by Paul Vixie **xv**

ACKNOWLEDGMENTS **xvii**

INTRODUCTION **xix**

Virtualization: A Brief History xx
So What's Xen Again? (And Why Should I Use It?) xxi
Xen's Limitations xxii
So, Why Should I Use Xen? xxii
Overview of the Book xxiii
But I Am Impatient! xxiv

1
XEN: A HIGH-LEVEL OVERVIEW **1**

Virtualization Principles 1
Virtualization Techniques: Full Virtualization 3
Virtualization Techniques: OS Virtualization 4
Paravirtualization: Xen's Approach 4
How Paravirtualization Works 4
Xen's Underpinnings: The Gory Details 6
Scheduling 6
Interrupts 7
Memory 7
I/O Devices 10
Networking 11
Block Devices 11
Putting It Together 12

2
GETTING STARTED **13**

Hardware Compatibility 14
Installing CentOS 15
Getting Familiar with Your Xen System 17
Management with xm 17
Making a DomU 18
Anatomy of a Domain Configuration File 19
Configuring the DomU 19
You're Finished. Have a Cookie. 21

3
PROVISIONING DOMUS **23**

A Basic DomU Configuration 24
Selecting a Kernel 24

(C) 2009 by Chris Takemura and Luke S. Crawford

Quick-and-Dirty Install via tar 25
Why This Is Not the Best Idea 25
Stuff to Watch Out For 26
Using the Package Management System with an Alternate Root 27
Red Hat, CentOS, and Other RPM-Based Distros 27
Debootstrap with Debian and Ubuntu 28
QEMU Install 30
virt-install—Red Hat's One-Step DomU Installer 31
Converting VMware Disk Images 33
Mass Deployment 34
Manual Deployment 34
QEMU and Your Existing Infrastructure 35
Installing pypxeboot 38
Automated Installs the Red Hat Way 39
And Then 41

4
STORAGE WITH XEN **43**

Storage: The Basics 44
Varying Types of Storage 44
Basic Setup: Files 45
LVM: Device-Independent Physical Devices 47
Enlarge Your Disk 51
File-Backed Images 52
LVM 52
Copy-on-Write and Snapshots 53
LVM and Snapshots 54
Storage and Migration 55
Network Storage 55
Closing Suggestions 58

5
NETWORKING **59**

Xen's Network Setup Process 60
Defining Virtual Interfaces 61
Naming Virtual Interfaces 62
Autoconfiguration 64
Specifying a MAC Address 65
Manipulating vifs with xm 66
Securing Xen's Virtual Network 66
Specifying an IP Address 66
Firewalling the Dom0 67
Networking with network-route 67
Networking with network-bridge 68
Networking with network-nat 70
Configuration Variables 71
Custom Network Scripts 72
Multiple-Bridge Setups 72
Bridged and Routing 73
Further Thoughts 74

The Book of Xen
(C) 2009 by Chris Takemura and Luke S. Crawford

6
DOMU MANAGEMENT: TOOLS AND FRONTENDS 75

Tools for the VM Provider 76
Xen-tools 76
libvirt, virsh, and virt-manager 81
Administering the Virtualized Data Center 85
Administration for the VM Customer 85
Xen-shell 85

7
HOSTING UNTRUSTED USERS UNDER XEN: LESSONS FROM THE TRENCHES 89

Advantages for the Users 89
Shared Resources and Protecting Them from the Users 90
Tuning CPU Usage 91
Scheduling for Providers 94
Controlling Network Resources 94
Storage in a Shared Hosting Environment 98
Regulating Disk Access with ionice 99
Backing Up DomUs 100
Remote Access to the DomU 102
An Emulated Serial Console 102
A Menu for the Users 103
PyGRUB, a Bootloader for DomUs 104
Making PyGRUB Work 106
Wrap-Up 108

8
BEYOND LINUX: USING XEN WITH OTHER UNIX-LIKE OSs 109

Solaris 110
Getting Started with Solaris 110
Solaris Dom0 112
Setting Up Xen 112
Solaris SMF 113
Creating a Solaris DomU 114
Creating a Solaris DomU Under Linux 116
OpenSolaris DomU Postinstall Configuration 117
NetBSD 118
NetBSD's Historical Xen Support 118
Installing NetBSD as a Dom0 119
Installing NetBSD as a DomU 121
Beyond Paravirtualization: HVM 123

9
XEN MIGRATION 125

Migration for Troglodytes 126
Migration with xm save and xm restore 127
Cold Migration 128

The Book of Xen
(C) 2009 by Chris Takemura and Luke S. Crawford

Live Migration 129
How It Works 129
Making Xen Migration Work 130
Migrating Storage 133
ATA over Ethernet 133
iSCSI 136
Quo Peregrinatur Grex 139

10
PROFILING AND BENCHMARKING UNDER XEN 141

A Benchmarking Overview 142
UnixBench 143
Analyzing Network Performance 144
Measuring Disk Performance with Bonnie++ 146
Application Benchmarks 147
httperf: A Load Generator for HTTP Servers 147
Another Application Benchmark: POV-Ray 149
Tuning Xen for Optimum Benchmarking 149
Profiling with Xen 150
Xenoprof 151
Getting OProfile 151
Profiling Multiple Domains in Concert 154
An OProfile Example 156
Conclusion 157

11
CITRIX XENSERVER: XEN FOR THE ENTERPRISE 159

Citrix's Xen Products 160
The Benefits of Using Citrix XenServer 161
Ten Minutes to Xen 161
The Disadvantages of Using Citrix XenServer 162
Getting Started 162
Prerequisites 162
Installing Citrix XenServer 163
Citrix's Xen GUI: XenCenter 164
Administering VMs with the XenCenter 164
Installing DomU Images 165
Installing from the Debian Templates 165
Templated Linux VM 166
Windows Install 167
Creating DomU Images with P2V 167
Converting Pre-existing Virtual or Physical Machines with XenConvert 167
XenServer Tools in the DomU 167
xe: Citrix XenServer's Command-Line Tool 168
XenServer's Disk Management 169
Xen Storage Repositories 170
Emulated CD-ROM Access 171
XenServer VM Templates 172
XenServer Resource Pools 172
Citrix XenServer: A Brief Review 173

The Book of Xen
(C) 2009 by Chris Takemura and Luke S. Crawford

12
HVM: BEYOND PARAVIRTUALIZATION 175
Principles of HVM ... 176
Device Access with HVM ... 177
HVM Device Performance ... 177
HVM and SMP ... 178
HVM and Migration ... 179
Xen HVM vs. KVM ... 179
Working with HVM ... 180
Creating an HVM Domain ... 181
Interacting with an HVM Domain ... 183
Getting the Standard Xen Console to Work ... 184
HVM Devices ... 184
Paravirtualized Drivers ... 185
And, for Our Next Trick 186

13
XEN AND WINDOWS 187
Why Run Windows Under Xen? ... 187
Windows on Xen: Prerequisites ... 188
Windows on Xen: Installation ... 189
Installing Windows Manually ... 189
A Discussion of HALs ... 190
Installing Windows the Red Hat Way ... 191
Windows with the Virtual Framebuffer ... 193
Et Voilà! ... 194
Windows Activation ... 195
Graphics Cards ... 195
Paravirtualized Drivers for Windows ... 196
Proprietary Windows PVM Drivers ... 196
GPL Windows Paravirtualized Drivers ... 196
Ongoing Development ... 198

14
TIPS 199
Compiling Xen ... 200
Compile-Time Tuning ... 202
Alternate Kernels (Dom0 and DomU) ... 203
paravirt_ops Dom0 ... 203
paravirt_ops DomU ... 205
The Xen API: The Way of the Future ... 207
Managing Memory with the Balloon Driver ... 208
PCI Forwarding ... 209
GRUB Configuration ... 210
The Serial Console ... 211
Enabling Serial Output ... 211
The Xen Hypervisor Console ... 212
Xen and LILO ... 212
The Virtual Framebuffer ... 213
Use of the XenStore for Fun and Profit ... 214
Automatically Connecting to the VNC Console on Domain Boot ... 215

The Book of Xen
(C) 2009 by Chris Takemura and Luke S. Crawford

15
TROUBLESHOOTING 219

Troubleshooting Phase 1: Error Messages ... 220
Errors at Dom0 Boot ... 220
DomU Preboot Errors ... 222
Creating Domains in Low-Memory Conditions ... 222
Configuring Devices in the DomU ... 223
Troubleshooting Disks ... 223
VM Restarting Too Fast ... 224
Troubleshooting Xen's Networking ... 225
The DomU Interface Number Increments with Every Reboot ... 227
iptables ... 227
Memory Issues ... 228
Other Messages ... 228
A Constant Stream of 4GiB seg fixup Messages ... 230
The Importance of Disk Drivers (initrd Problems) ... 230
XenStore ... 231
Xen's Logs ... 232
dmesg and xm dmesg ... 232
Logs and What Xen Writes to Them ... 232
Applying the Debugger ... 234
Xen's Backend Architecture: Making Sense of the Debug Information ... 234
Domain Stays in Blocked State ... 235
Debugging Hotplug ... 236
strace ... 237
Python Path Issues ... 238
Mysterious Lockups ... 238
Kernel Parameters: A Safe Mode ... 239
Getting Help ... 239
Mailing Lists ... 239
The Xen Wiki ... 240
The Xen IRC Channel ... 240
Bugzilla ... 240
Your Distro Vendor ... 240
xen-bugtool ... 240
Some Last Words of Encouragement ... 241

A
XM REFERENCE 243

xm's Syntax ... 244
xm Subcommands ... 244

B
THE STRUCTURE OF THE XEN CONFIG FILE 251

List of Directives ... 253
HVM Directives ... 258
Device Model Options ... 260

INDEX 263
